Rego's TBM Journey Map

Tim Pietro

VP, Business Development
Rego Consulting

Welcome to IT Service TCO

The following summary page describes the reports and screens that are leveraged as part of the IT Service TCO process. Most users will access the first set of reports on the Executive Review. Other users, that are more engaged in the setup and administration of Service TCO, will access additional reports and screens where budget and distribution rules are put in place.

You can access the report or screen of interest from the links in on the left in each of the tabs below. Please note that you will have access to only those that are associated to your role

1. Leadership Alignment

**Define Vision
& Strategy**

**Define Success
Indicators**

**Transformation
Playbook**

By leveraging Technology Business Management, we will now have a better way to discuss **needs, tradeoffs, and funding decisions** with the business in terms that they can understand while making the magic of IT happen behind the scenes.

Customer and Client Focused

- Facilitate operating IT as a Business – Business of IT
- Represent IT in terms of services and capabilities versus technologies
- Inform the business in terms they understand by leveraging our extended TBM Taxonomy and Portfolio of Services & Offerings

Cost Effective

- Provide true total cost of ownership and transparency
- Identify key cost levers to help facilitate the opportunity to reduce run-the-business costs
- Enable ability for reinvestment of savings into changing, growing, and transforming the business

Business Value Driven

- Maximize value of IT investments
- Reduce time to capability through leverage & reuse
- Provide factual transparency for better investment decisions

UCaaS	Video Conferencing

Service Roles LifeCycle & RASCI

Services LifeCycle

Phase	Description
Strategize	Align with business strategy and client demand to identify needed service changes, connect to value creation, and leverage the IT portfolio. Then prioritize service roadmaps.
Plan	Translate service roadmaps and requirements into the project and implementation plans and share them with the business. Architect and design/reuse service solutions in response to service requirements.
Implement	Review service architecture with the business. Build, test, and deliver systems and solutions. Prepare business expectations, culture, and processes for service deployments and changes.
Operate	Support growth in service adoption and utilization by clients, reviewing value to validate alignment and identify course corrections. Handle service risk, events, issues, and provider relationships.
Optimize	Benchmark, measure, and review service performance to identify improvement opportunities to work into the service roadmap. Aggregate the service value results into the IT portfolio.

Phase	Service LifeCycle Responsibility	Accountable	Responsible	Support	Consulted	Informed	Other	Other	Other	Other	Other	Other	Other	Other	Other
Strategize	The First TSM Value Conversation - Strategy Alignment														
	Identify changes in the customer/client needs, track in demand management solution (recommended)														
	Identify and document service offering requirements, track in demand management solution (recommended)														
	Identify changes in industry trends														
	Enable service offering delivery														
	Provide service delivery status checks														
Plan	The Four TSM Value Conversations - Portfolio Planning														
	Develop Project/Implementation Plan														
	Identify and document architecture and technology roadmap of the service team														
	Identify and document architecture and technology roadmap of the service offering team														
	Ensure alignment with overall Corporate Enterprise Architecture roadmap														
	Ensure alignment with Service Management and Serviceability Framework

Implement Service Roles

Implement Service Reviews

Service Reviews

Service Reviews are designed for each service team to tell a comprehensive story about enabling business outcomes through architecture, strategy, and specific services, explaining the value that is achieved from our investment.

Summary	IT Service Metrics	Decisions Needed
<ul style="list-style-type: none"> • This is your Portfolio view on the business outcomes you will achieve, and how it relates to Services executing on the strategies • Use high level quantitative metrics to show impact to services (drill down in Service metrics dashboard) 	<ul style="list-style-type: none"> • Use the Services dashboard to tell a specific story • Show the Visual of Green and say, 'we're great on these, but we need to talk about the reds and the yellow, our areas of concern' 	<ul style="list-style-type: none"> • Talk about the choices you have, and architectural decision needed • Relate this back to "What keeps me up at night"

Architecture Roadmap	Investment Summary	Key Messages
<ul style="list-style-type: none"> • List only architecture items – this is NOT a list of every item on the implementation roadmap • Ensure this links to the Summary (same strategies listed) • Indicate use of continuous delivery in relation to this IT strategy 	<ul style="list-style-type: none"> • Your TCO curves • State number of demand/ideas and active projects against your services. • Provide project statuses. • State how your CtB investments reduce your RtB spend. 	<ul style="list-style-type: none"> • Three (3) distinct messages • Emphasize the key points from your presentation (relate each point back to material on previous slides or metrics dashboard) • Conclude and balance your story by highlighting your successes (from roadmap) and value (from Investment Summary or summary slide)

Let Rego be your guide.

Accelerating Value with TBM Challenges as a technology department

Like many organizations, I think, across our business areas and our IT area, we - for years - strategically planned rather independently. We had different priorities, we had different budget targets.

And it was a bit of that model of the business area plans, what they think their technology needs are and they tend to throw those over
