## Data Model | Intermediate

Your Guides: Dave Matzdorf and Luis Palacios

## Agenda

- Introductions
- Common Tables
- Modern UX
- Data Warehouse (DWH)
- Tips and Tricks
- Admin Activities and System Settings
  - Financial Processing
  - Time Slice Settings
  - Datawarehouse
  - Job Schedules
- Questions

regoUniversity2023

2

# Introduction

- Take 5 Minutes
- Turn to a Person Near You
- Introduce Yourself
- Business Cards

4

## Why worry about the Data Model

- Most data available in Clarity can be easily queried
- Queries are key to customizing Clarity:
  - Dynamic Lookups
  - NSQL Queries/Portlets
  - Reporting (Jaspersoft or external systems)
  - Building Integrations
  - Custom processes and gel scripting

## Base Tables

•Custom Investments and Projects:

•INV\_INVESTMENTS

•PRTASK

•PRTEAM

•PRASSIGNMENT

#### •Timesheets

•PRTIMESHEET

•PRTIMEENTRY

#### •Financials

•PPA\_WIP

•PPA\_WIP\_VALUES

•Time Slices

 Exercise: Project Task Assignments Actuals and ETCs By Month – Multi-Dimensional

-- Slice Requests SELECT \* FROM PRJ\_BLB\_SLICEREQUESTS SR ORDER BY SR.ID

-- Main Slice Table SELECT \* FROM PRJ\_BLB\_SLICES

-- Resource Availability SELECT SRMR.FULL\_NAME , AV.SLICE\_DATE , AV.SLICE FROM SRM\_RESOURCES SRMR JOIN PRJ\_BLB\_SLICEREQUESTS SR ON SR.REQUEST\_NAME = 'MONTHLYRESOURCEAVAILCURVE' JOIN PRJ\_BLB\_SLICES AV ON SRMR.ID = AV.PRJ\_OBJECT\_ID AND SR.ID = AV.SLICE\_REQUEST\_ID WHERE 1=1 ORDER BY SRMR.FULL\_NAME , AV.SLICE\_DATE

-- Team Allocation SELECT TM.PRID TEAM\_ID , INVI.NAME INVESTMENT NAME , SRMR.FULL\_NAME RESOURCE\_NAME , AL.SLICE DATE , AL.SLICE FROM INV\_INVESTMENTS INVI JOIN PRTEAM TM ON INVI.ID = TM.PRPROJECTID JOIN SRM\_RESOURCES SRMR ON TM.PRRESOURCEID = SRMR.ID JOIN PRJ\_BLB\_SLICEREQUESTS SR ON SR.REQUEST\_NAME = 'MONTHLYRESOURCEALLOCCURVE' JOIN PRJ\_BLB\_SLICES AL ON TM.PRID = AL.PRJ\_OBJECT\_ID AND SR.ID = AL.SLICE\_REQUEST\_ID **WHERE 1=1 ORDER BY INVI.NAME** , SRMR.FULL\_NAME , AL.SLICE\_DATE

-- FTC and Actual Slices SELECT A.PRID ASSIGNMENT ID , INVI.NAME INVESTMENT NAME , T.PRNAME TASK NAME , SRMR.FULL NAME RESOURCE NAME , S.SLICE DATE , SUM(CASE WHEN SR.REQUEST\_NAME = 'MONTHLYRESOURCEACTCURVE' THEN S.SLICE ELSE 0 END) ACT , SUM(CASE WHEN SR.REQUEST\_NAME = 'MONTHLYRESOURCEESTCURVE' THEN S.SLICE ELSE 0 END) ETC FROM INV INVESTMENTS INVI JOIN PRTASK T ON INVI.ID = T.PRPROJECTID JOIN PRASSIGNMENT A ON T.PRID = A.PRTASKID JOIN SRM RESOURCES SRMR ON A.PRRESOURCEID = SRMR.ID JOIN PRJ BLB SLICEREQUESTS SR ON SR.REQUEST NAME IN ('MONTHLYRESOURCEACTCURVE', 'MONTHLYRESOURCEESTCURVE') JOIN PRJ\_BLB\_SLICES S ON A.PRID = S.PRJ\_OBJECT\_ID AND SR.ID = S.SLICE REQUEST ID **WHFRF 1=1 GROUP BY A.PRID** , INVI.NAME , T.PRNAME , SRMR.FULL NAME , S.SLICE DATE **ORDER BY INVI.NAME** 

- Cost Plans
  - FIN\_PLANS
  - FIN\_COST\_PLAN\_DETAILS
- Cost Plan Details By Period are stored in Timeslices
- Exercise: Forecast and Budget by Project

- Status Reports are an add-in object, widely used in Classic UI and MUX
- It is created as a custom object, primary table is: ODF\_CA\_COP\_PRJ\_STATUSRPT
- Status Report components include DB functions and views
- i.e. Getting the latest status report: cop\_prj\_statusrpt\_latest\_v

### Risk, Issue, Change Requests

- Risk Issue Change table
  - RIM\_RISK\_AND\_ISSUES
  - RIM\_CHANGE\_REQUESTS
- Custom Risk Issue Change tables
  - ODF\_CA\_RISK
  - ODF\_CA\_CHANGE
  - ODF\_CA\_ISSUE

### Baselines

- Project Baselines
  - PRJ\_BASELINES
  - ODF\_CA\_BASELINE
- Baseline Details stored in PRJ\_BASELINE\_DETAILS for:
  - Project Details
  - Team Details
  - Task Details
  - Assignment Details

# Modern UX

## Modern UX and DB Schema Updates

- Modern UX is actively being enhanced with new functionality.
- Releases include new functionality which impacts the DB schema. Some recent enhancements:
  - Checklists
  - To Do's
  - Hierarchies
  - Conversations
  - Agreements
  - Teams
  - Resource Plans
  - Objectives
  - Parent Relationship
- DWH is also being kept up to date with reporting enhancements and MUX components.
- Best way to remain informed, is by reviewing the release notes and schema documentation

- Custom Investments use the Investment meta-object as its base. Sharing key tables like:
  - INV\_INVESTMENTS (Identified with ODF\_OBJECT\_CODE)
  - FIN\_FINANCIALS
- Store additional fields by following the custom object convention: ODF\_CA\_<Object Code>

### MUX Tables

- Roadmaps:
  - RDM\_ROADMAPS
  - RDM\_ROADMAP\_ITEMS
- Hierarchies:
  - ODF\_HIERARCHIES
- To Do's:
  - OBA\_TODOS

### MUX Admin Tables

- Views and Personalizations:
  - ODF\_UI\_VIEWS
  - CMN\_UI\_PERSONALIZATIONS
- Blueprints:
  - ODF\_BLUEPRINTS
  - ODF\_ABSTRACT\_BLUEPRINTS
- Lookups:
  - CMN\_LOOKUPS
- Most functionality is stored in the DB like:
  - Business Rules
  - Actions
  - Field Level Security
  - Much more....

### DWH

- DWH will change based on the Studio configuration, best way to navigate is understanding the naming convention provided through product documentation
- DWH schema can be reviewed by running the Jasper Report: DWH Schema
- DWH operates on a star-based data model composed of:
  - Dimension tables containing custom fields and metadata
  - Fact tables with metrics, organized by periods

# Tips and Tricks

### How To Find Database Objects

- Clarity Studio
  - Portlets
  - Lookups
  - Objects and Attributes
- SQL Trace
- Data Dictionary Tables
  - USER\_OBJECTS / SYS.OBJECTS
  - USER\_TABLES / INFORMATION\_SCHEMA.TABLES
  - USER\_TAB\_COLUMN / INFORMATION\_SCHEMA.COLUMNS
- Jaspersoft reports
- Rego's Data Dictionary Extractor

### Administration – Time Slices

- Time Slice Settings:
  - Slice Period
  - From and Number of Periods
  - Rollover Internal and Expiration

### Time Slices and Rollover

• Time slices rollover and only refresh data inside the defined range

TIME SLICE ID 193
*TIME SLICE NAME  DAILY_INCIDENT_ACTUALS
BROLLOVER INTERVAL Monthly
■ FROM DATE
SLICE PERIOD Daily
NUMBER OF PERIODS
365 ■→ITEM
Incident Actuals
EXPIRATION DATE <b>8/23/2021</b>

NUMBER OF PERIODS: number of buckets (12) Slice Period: Monthly

Let Rego be your guide.

### Administration – Important Jobs

Job	Purpose
Time Slicing	This job processes all configured time slices and updates discrete transactional data for the actual task assignment values, Estimate To Complete (ETC) and baselines, time sheet actuals, team and assignment data from a scenario, resource allocations to projects and resource availability.
Load Data Warehouse Job	The Load Data Warehouse Job extracts data from the database, transforms the data to a denormalized format, and loads the data into the data warehouse. The frequency of this job determines the freshness of the data. This job populates dimensions, facts, and lookups in the data warehouse for stock objects and attributes and any custom objects and attributes that have been explicitly enabled for inclusion in the Data Warehouse. This job also updates the Advanced Reporting domains, if you have set up Advanced Reporting with Jaspersoft. This also works with: Load Data Warehouse Access Rights Create Data Warehouse Trend Job
Rate Matrix Extraction Job	This job extracts rate matrix information and refreshes the rate matrix extraction tables. Run this job each time the rate matrix and the financial properties of a project change. The Rate Matrix Extraction job is required before retrieving rates on projects. You can prepare and update the rate matrix data. While the job is running, you can use the rate matrix data.
Update Report Tables Job	The Update Report Tables job is required for reports that display any of the following: monthly or weekly calendar periods; FTE amounts; and OBS level or phase grouping options. It is only required for Advanced Reporting reports that display resource skill relationships. The job populates reporting tables based on the parameters that you select when running the job. If these tables are not populated, reports dependent upon them display a 'No Data Found' message. Schedule the job to run nightly to keep the reporting tables up to date.
Datamart Extraction Job	This job extracts data from the transaction database tables and stores it in the legacy datamart reporting tables. These tables were the foundation for most stock reports and were used for any legacy custom reports. Tables can be easily identified by the NBI_ prefix

### Administration – Important Jobs

dof	Purpose
Post Actuals to Investment	Populate time scaled data used in per period metrics, custom investments and hierarchies
Time Slicing Sync	Provides time scaled data aggregation to be used in MUX per period metrics and group by functionality
DataWarehouse Related Jobs	<ul> <li>Time Slices</li> <li>Investment Allocation (Once a day before RME)</li> <li>Rate Matrix Extraction (RME)</li> <li>Datamart Extraction</li> <li>Update Report Tables</li> <li>Create and Update Jaspersoft Users</li> <li>Load DWH</li> <li>Load DWH Access Rights</li> <li>Trending Jobs (schedule varies depending on how many snapshots are required)</li> </ul>

### Administration - Financial Processing

- Timesheets
  - Post Timesheets Job
- Transaction Import (Invalid Transactions)
  - Post Transactions to Financials Job
- Trans Control
  - Post to WIP Job
- WIP (Posted Transactions)

## Questions?

Surveys

Please take a few moments to fill out the class survey. Your feedback is extremely important for future events.
