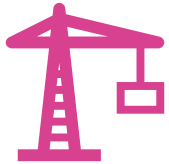
Introducing Moventus

Why Moventus?

In talking with our customers, we have found that they have small groups within their organizations that have started using Monday or ClickUp – looking for simple work management, where Clarity has some gaps.

In talking with active Monday / ClickUp users, we found that they WANT more enterprise features that are not available in these tools - like stronger governance, timesheets, resource management, roadmaps, etc.



Rego decided to build a robust, but simple work management add-on for Clarity – that combines the simple and easy to use UX of Monday / ClickUp with the powerful Clarity enterprise features.

Moventus is that solution – allowing groups to start with simple work management but have an easy path to mature without having to switch tools.
