

Innovation isn't optional at Rego. It's in our DNA.

# Fueling the the Future

2024 Rego Innovation Spend

\$1.5m

Rego has invested more than \$4.5M in the last two years, transforming Clarity into a platform that's easier, faster, and more powerful for our clients.

2025 Rego Innovation Spend

\$3m+

Solve Customer

Driven Problems

> Improve Adoption

> Expand Functionality

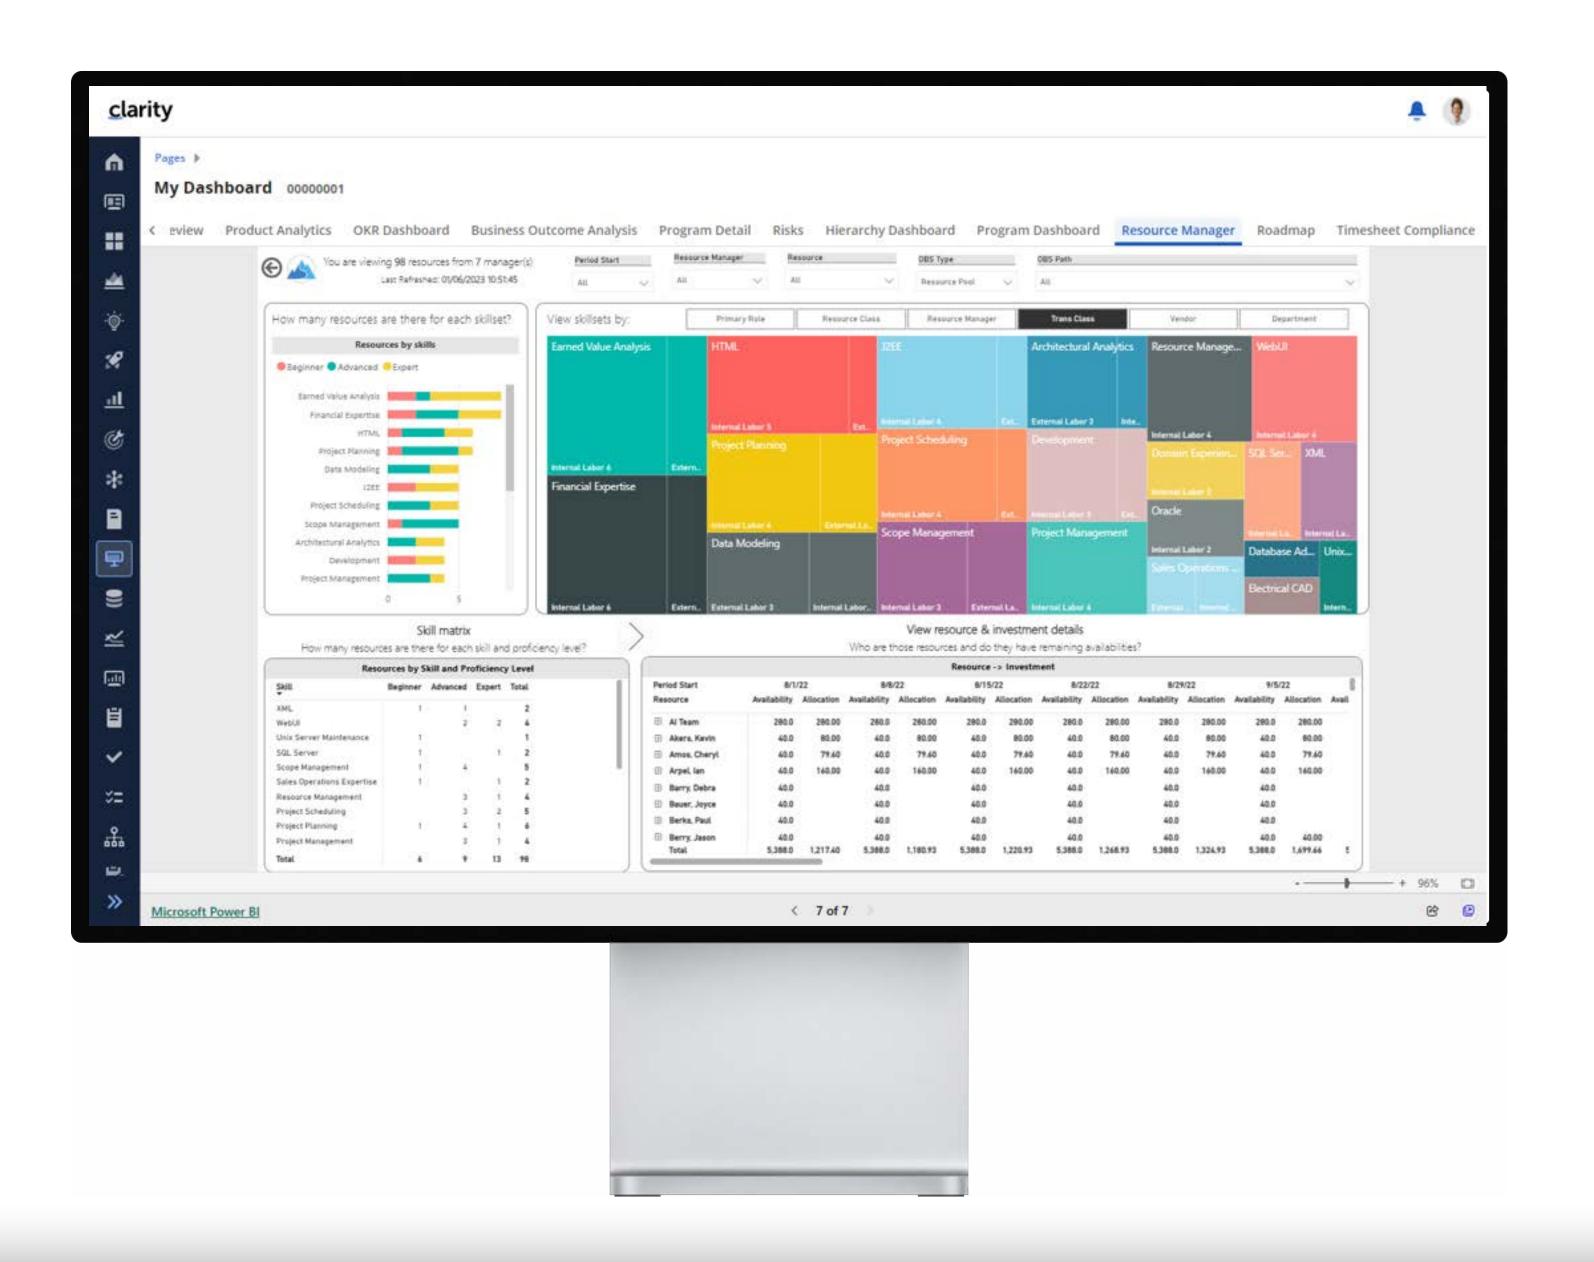

### RegoXchange Built by Rego, Shared with You

RegoXchange isn't just a library of Clarity assets, it epitomizes what we do at Rego.

- Over 50% of assets are completely free
- Represents thousands of hours of expert development
- Shared openly to help the Clarity community adopt faster, lower costs, and achieve more.

### Power BI / Tableau

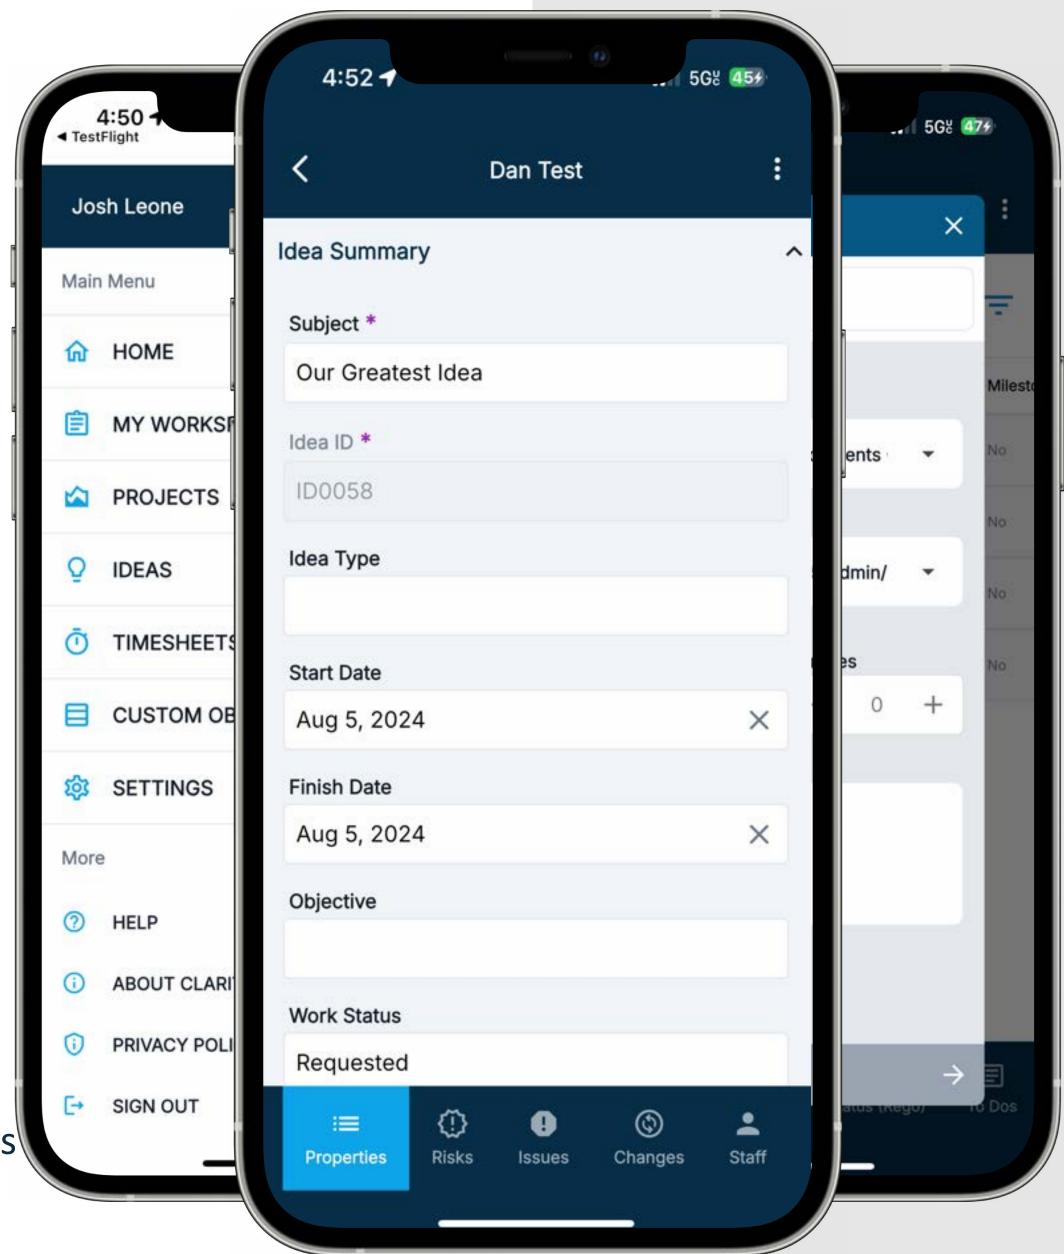

### 150+ Dashboards at Your Fingertips

Instant insights with pre-built
dashboards for Power BI and Tableau.
Over 100 Power BI and 50 Tableau
dashboards readily available through
RegoXchange.

### Clarity, in the palm of your hand

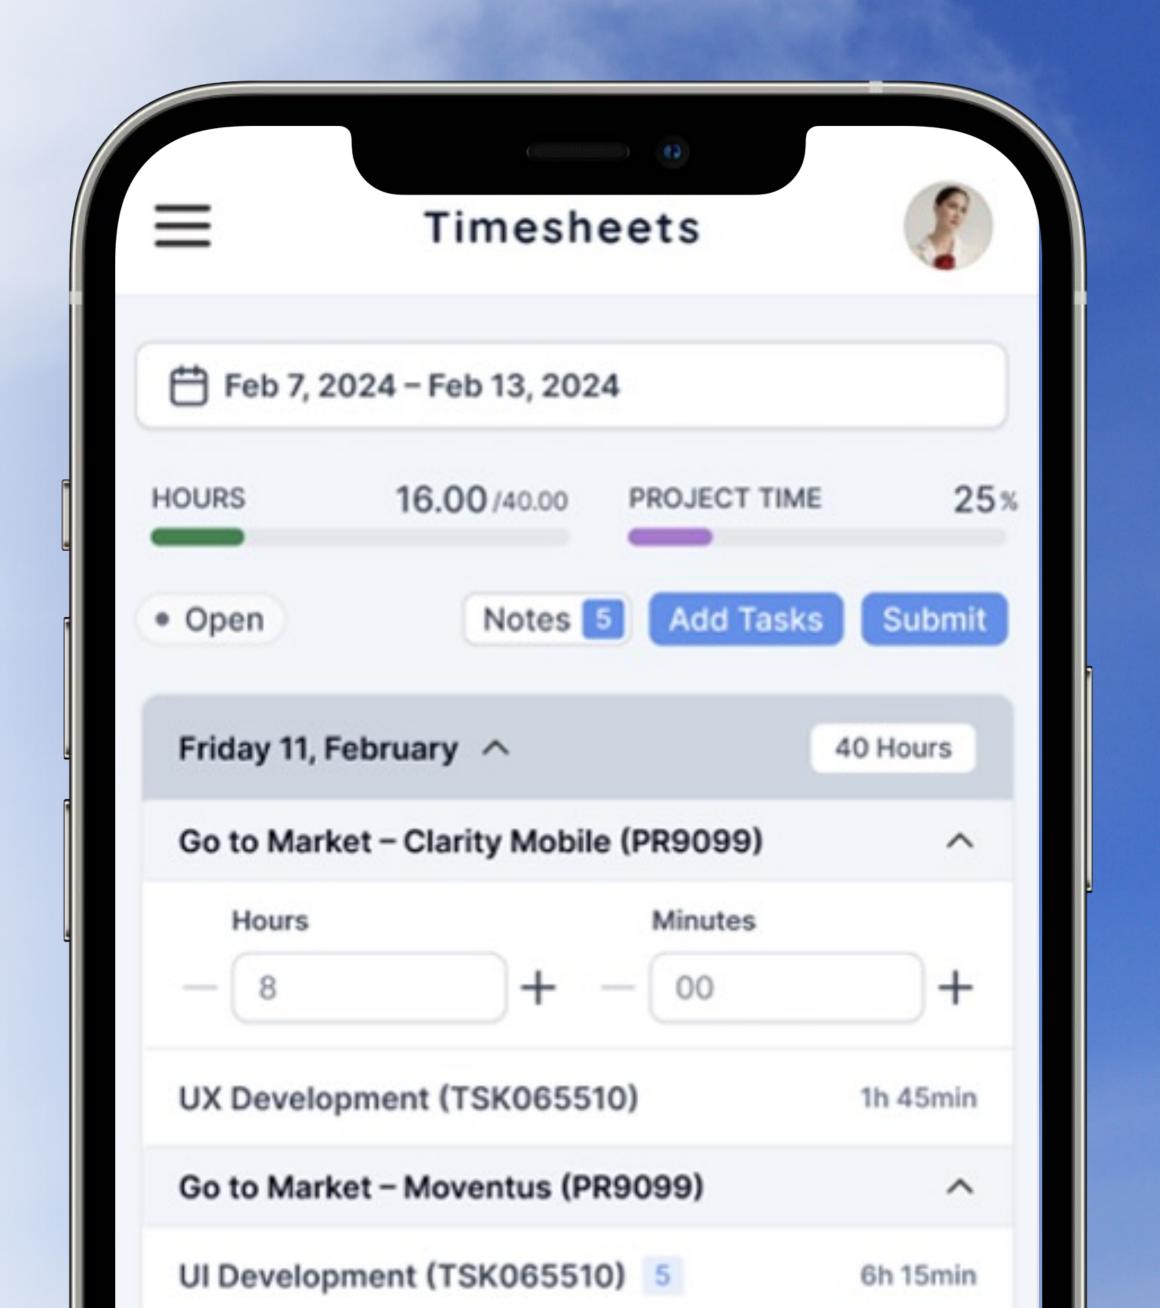

- True SSO & Set Any page to home
- View, Update, Add (Any Field Blueprint Driven)
  - Checklists & ToDos
  - Issues, Risks, Changes, Status Report
  - Team(Staff), Tasks, Assignments
  - Ideas, Projects, CITs
  - Timesheets and Approvals
- In Process PDF Reports, Boards, Custom Objects
- Next Al and Voice Driven Actions

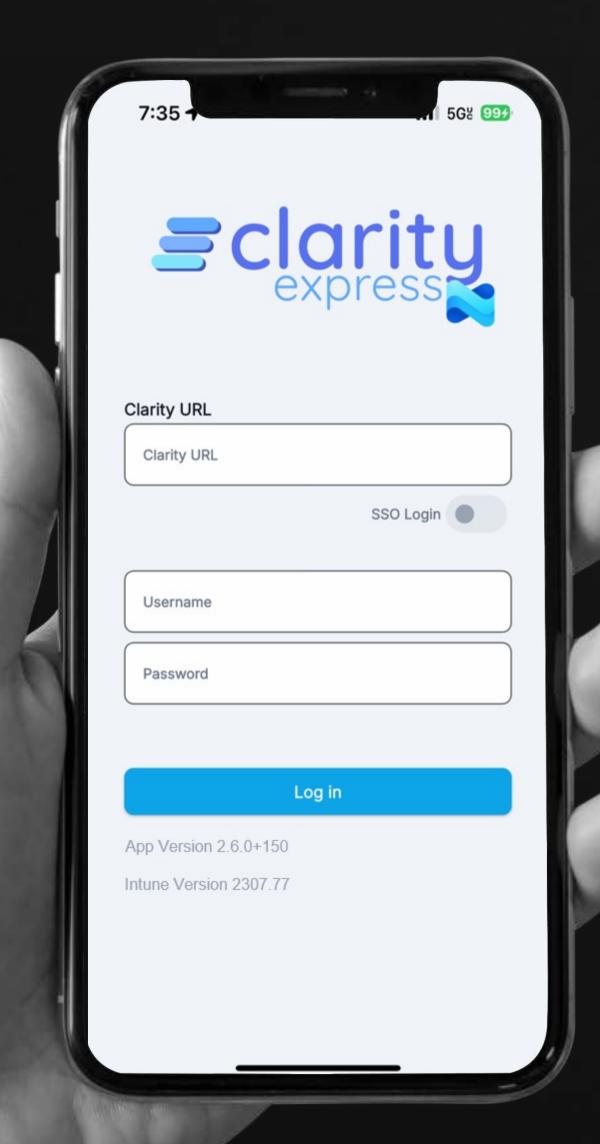

**CLARITY EXPRESS** 

## Mobile Timesheets Reimagined

- Designed for speed and simplicity.
- Hour and minute counters
- Add Time Directly from a Task
- Approvals and notifications

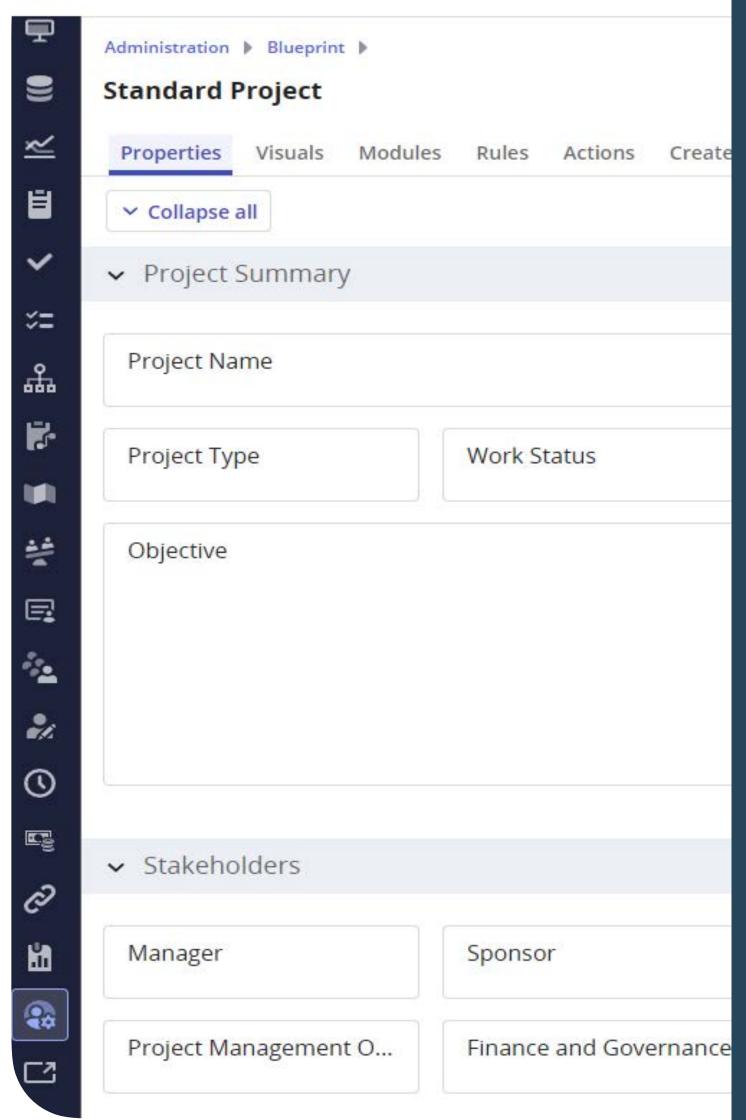

**CLARITY EXPRESS** 

Clarity Express now integrates seamlessly with Microsoft Intune, giving enterprises the security and management control they need without compromising user experience. This capability answers a key client request and sets Rego apart by delivering a fully mobile Clarity solution that meets enterprise IT standards.

### clarity

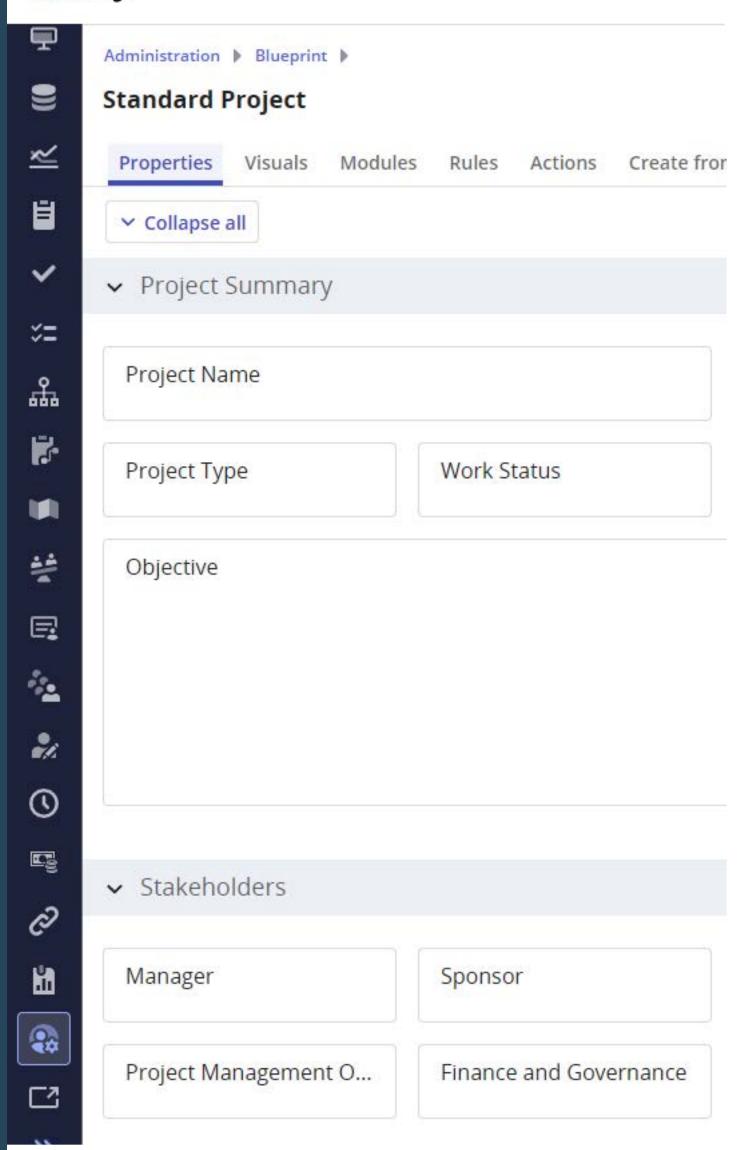

### Modern UX Migrator

### **Move Config in Minutes**

- Blueprints, views, and fieldlevel security
- Individual items or Packages of Items

### clarity

# Accelerate GEL development with Rego's VS Code extension.

Available in the VS Code marketplace. Speeds up scripting, ensures consistent style, and includes ready-made snippets to make GEL development faster and easier.

## Kickstart World Peace with JamTags

Ok... maybe we overstated the power of JamTags but they are super cool and great for simplifying Gel development. Plus, did we mention they are free.

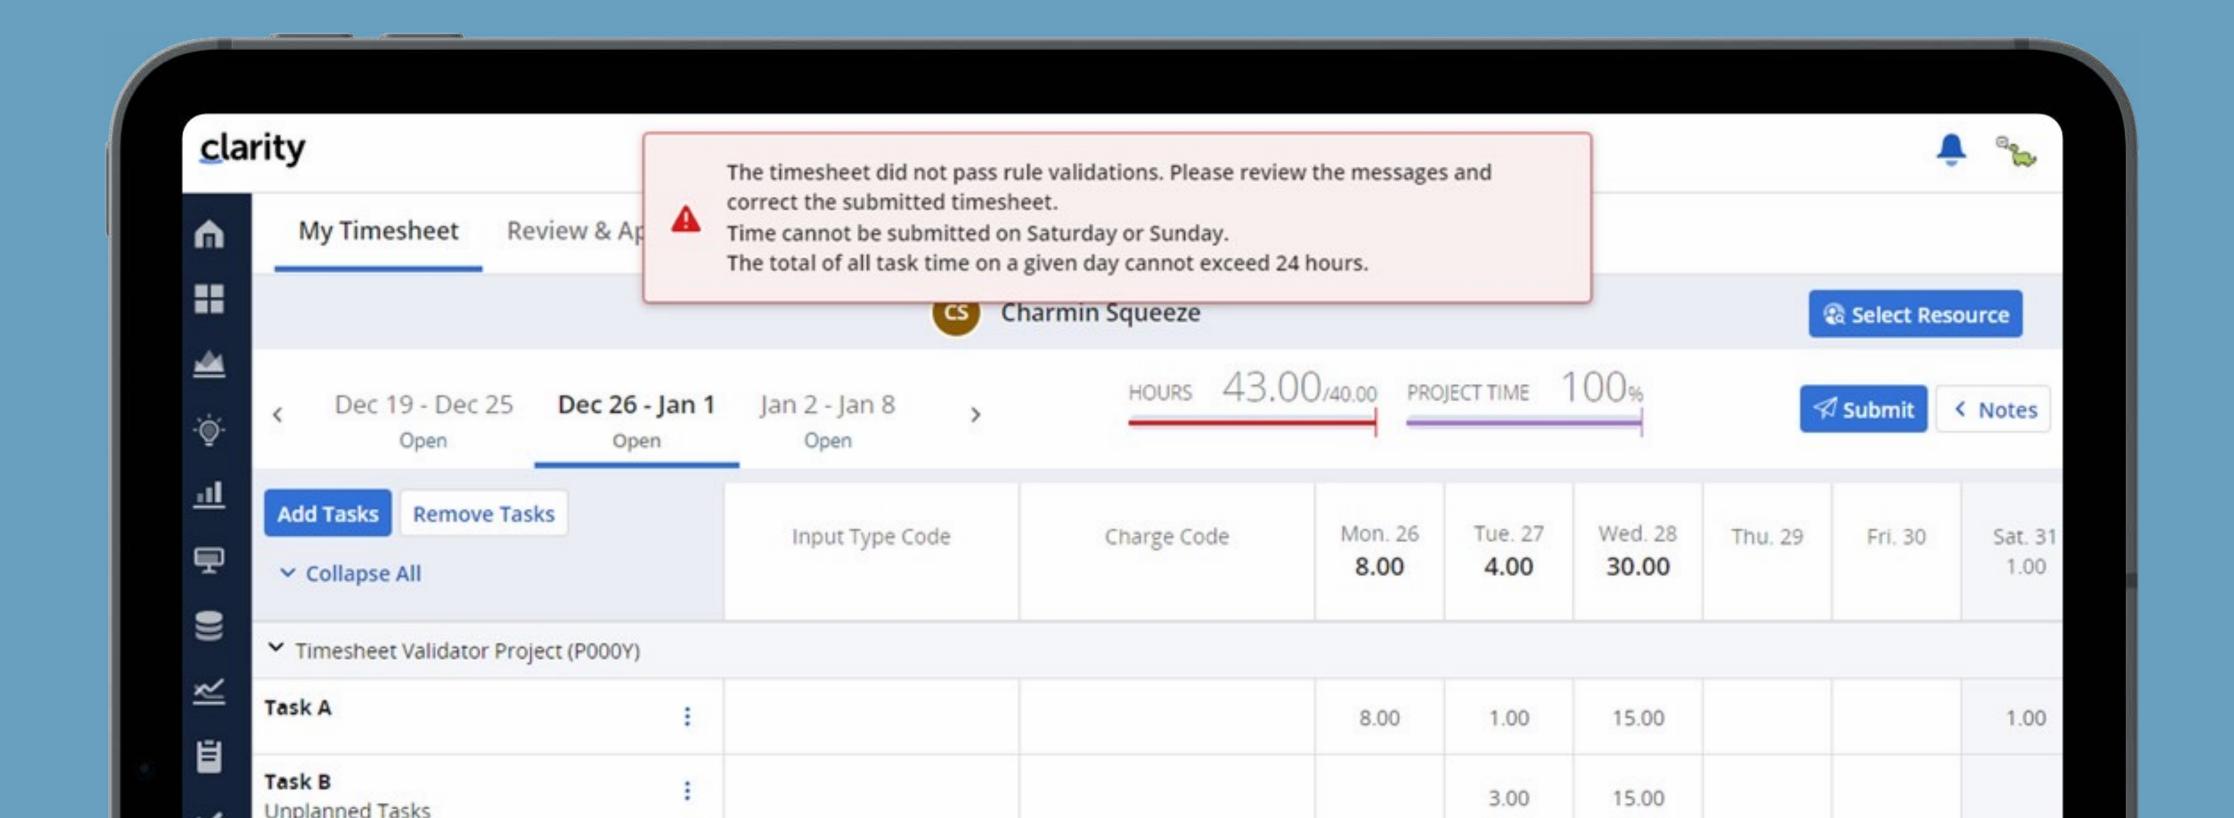

### Timesheet Compliance Made Simple

TIMESHEET RULES

Timesheet Rules let organizations configure validation logic directly within Clarity, without custom code or external support. Users receive instant, detailed pop-up messages while entering time, ensuring accuracy before submission.

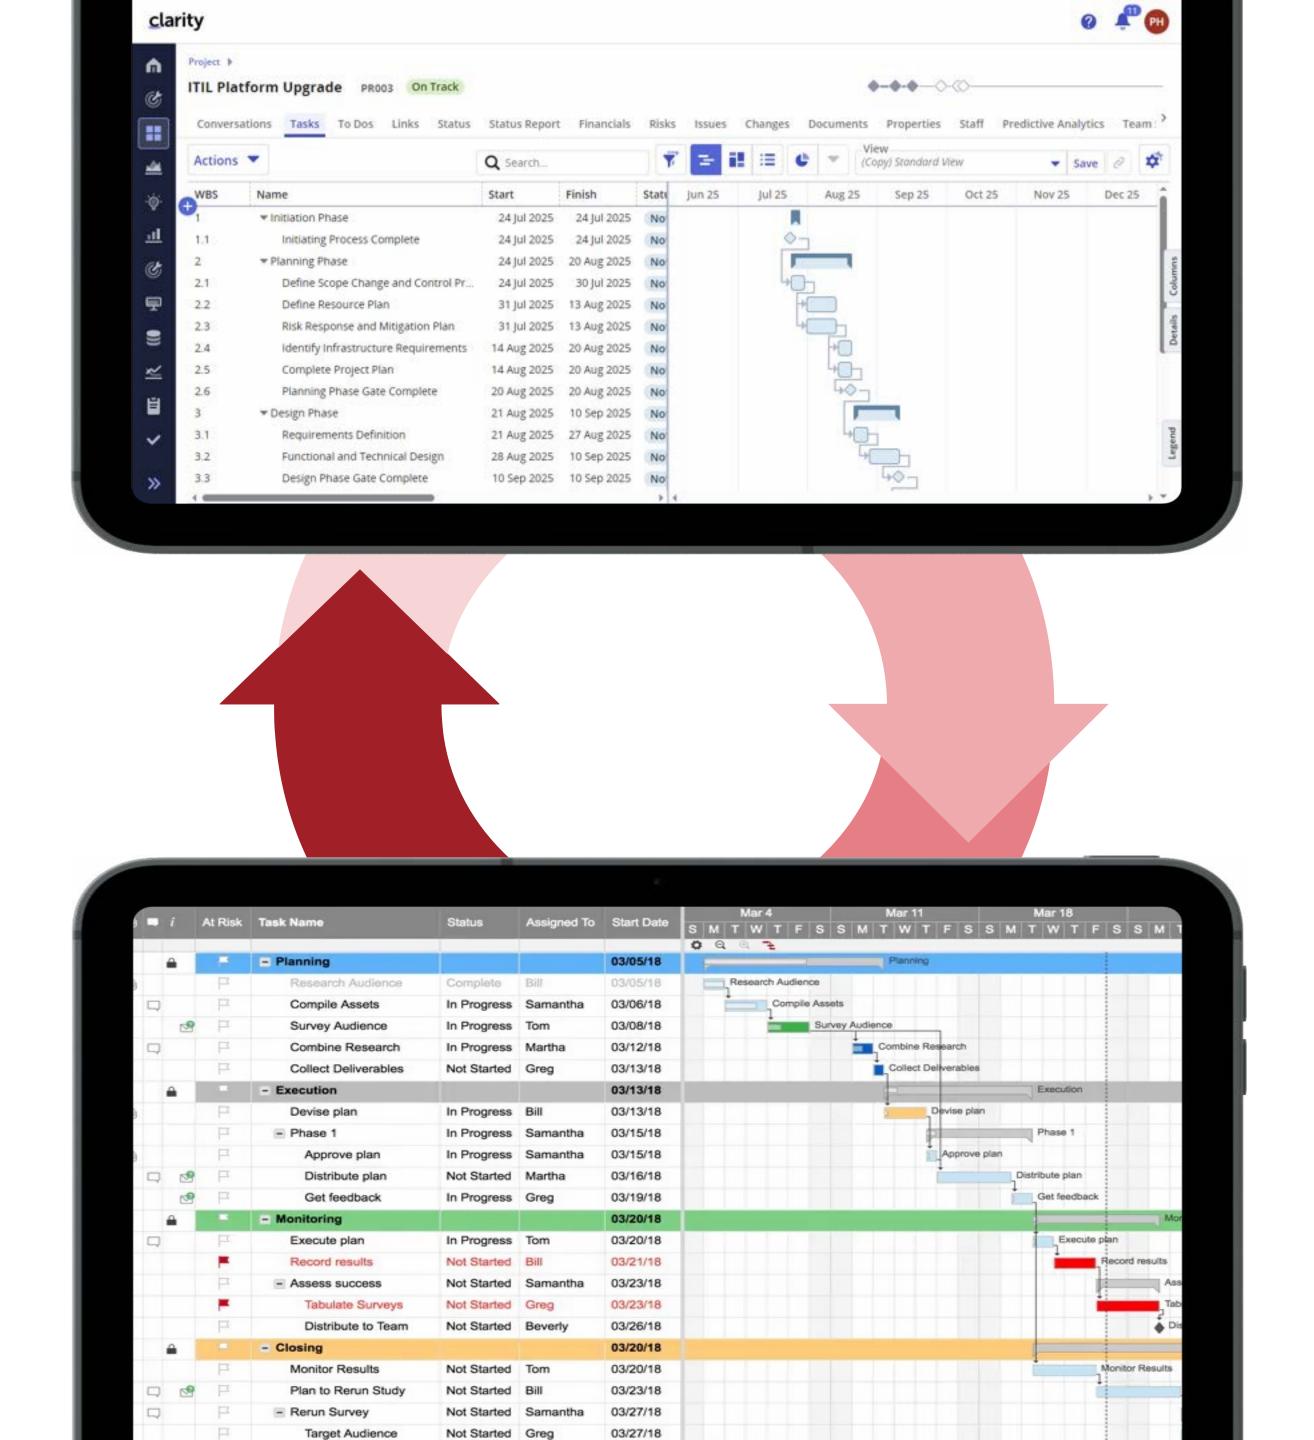

**SMARTSHEET CONNECTOR** 

### >> One Plan, Always in Sync

The Smartsheet Connector lets teams keep working in Smartsheet while automatically syncing project and task data back to Clarity.

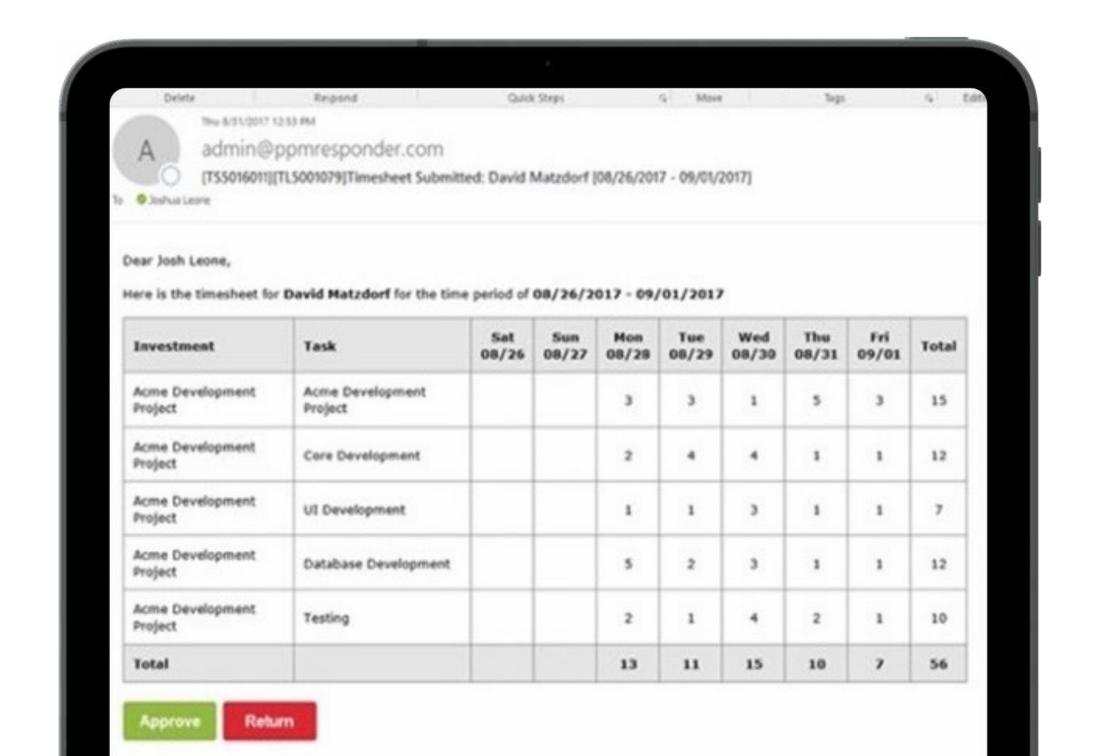

With full check-in/check-out functionality and 100% out-of-the-box support for SaaS and On-Premise, it eliminates duplicate entry and ensures schedules stay aligned across both solutions.

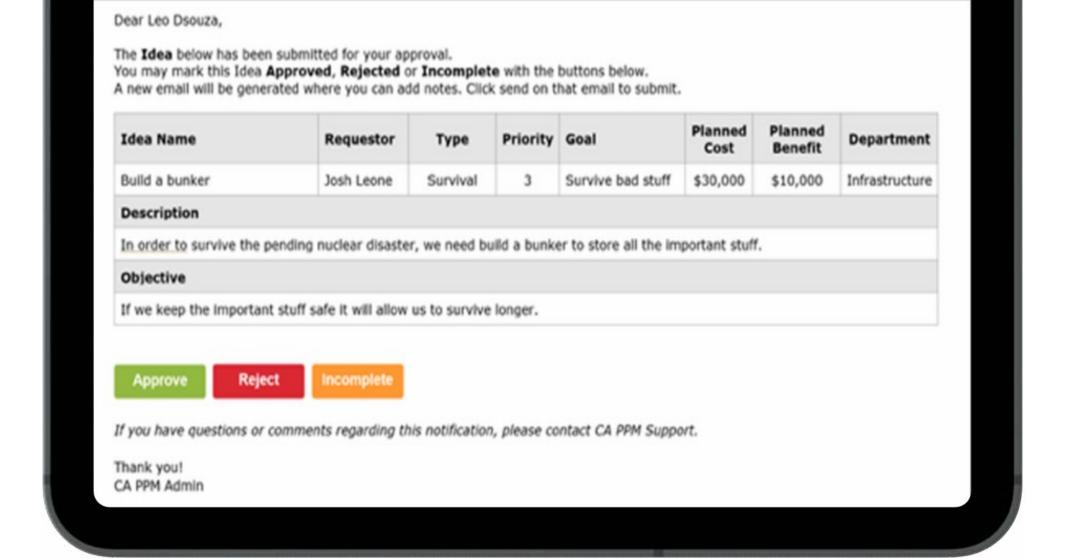

**ACTION ITEM RESPONDER** 

## Approve Actions Without Leaving Email

### FASTER DECISIONS, EFFICIENT WORKING

The Action Item Responder lets users approve, reject, or comment on tasks directly within their email — no need to log in to Clarity. It works across desktop, mobile, and tablet with 100% out-of-the-box compatibility. Rich email formatting, notes, and workflow support make approvals quicker and more engaging, driving adoption and saving valuable time.

**SURVEYS** 

## Feedback That Drives Action

- Respond directly from email increasing response rates.
- Configurable question types capture meaningful input
- Sample Surveys could include:
  - Application Feedback
  - Project Stakeholder on Closure
  - Team Feedback

# Roadmaps that Balance Role Capacity and Cost

### **SMARTER RESOURCING**

Role and team-based constraints help you identify capacity versus demand gaps, making it easier to balance resources and keep plans realistic.

### **DEEPER FINANCIAL INSIGHT**

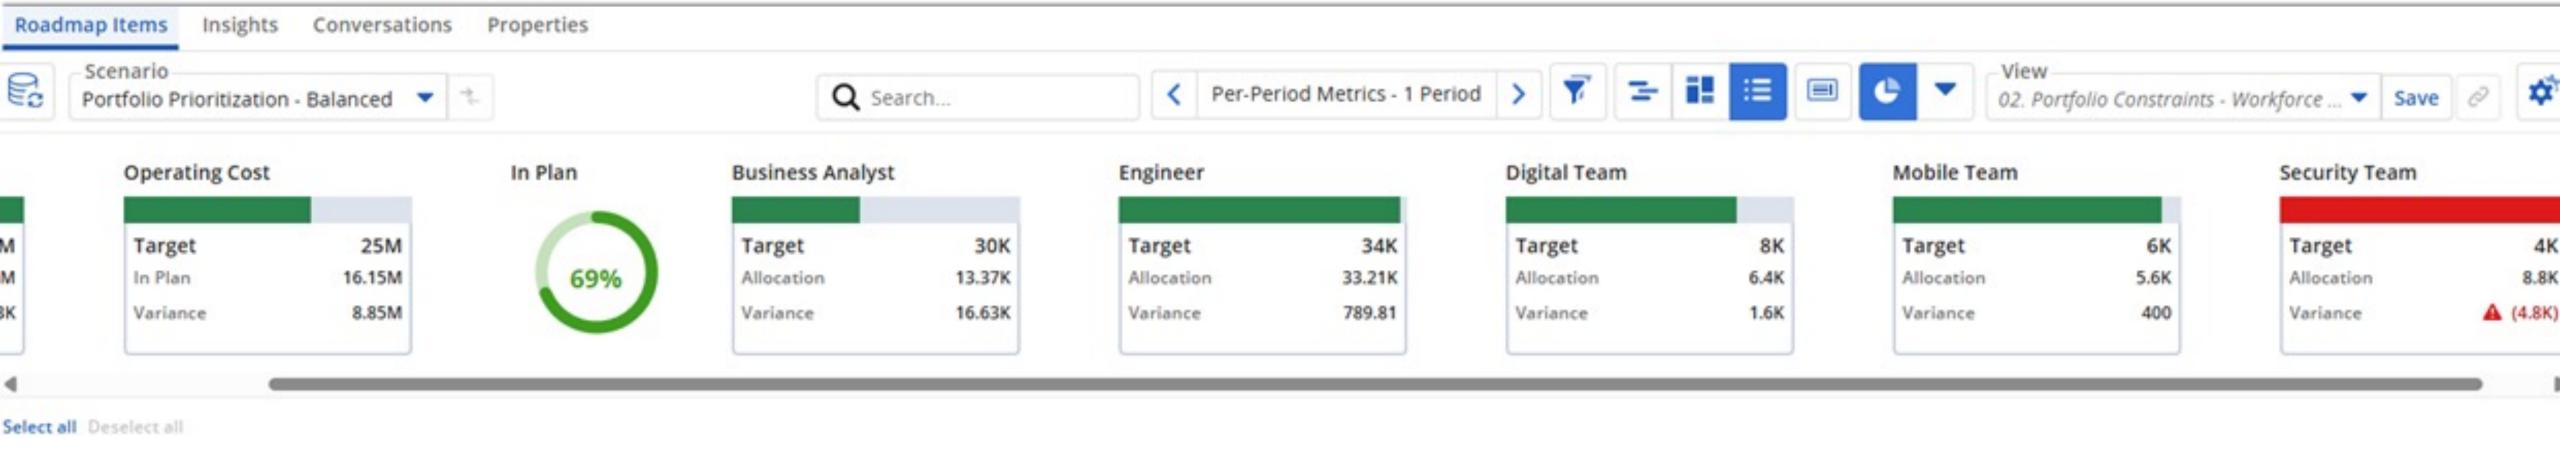

Cost plan details let you drill down beyond CapEx and OpEx totals to plan by charge codes, actuals, and labour versus non-labour giving you a full financial view inside the roadmap.

**ROADMAP POPULATION & SYNC** 

# Investments to Roadmaps & Roadmaps to Investments

Populate and maintain your roadmap, then convert items into live investments. Keep plans and execution aligned by pushing Roadmap updates directly into live Investments.

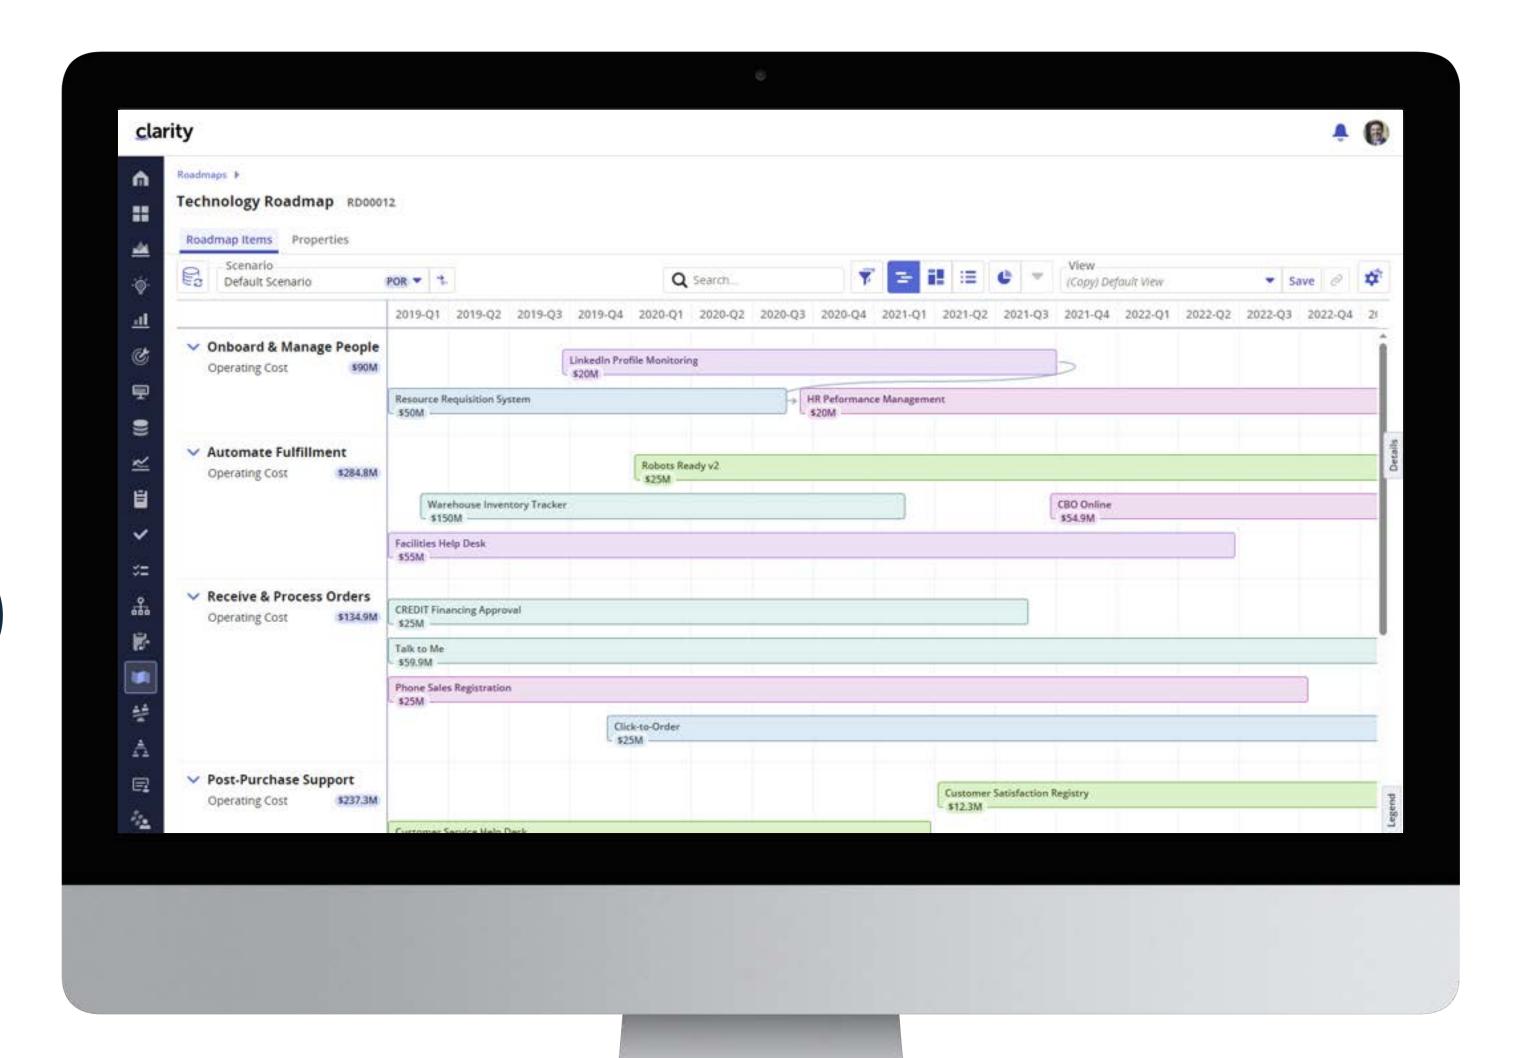

# Smarter Prioritization at Scale (a.k.a. Ranking Rules)

The Rego Roadmap Ranking automatically prioritizes roadmap items within scenarios using configurable rules based on attributes you define. Results are instantly applied and can be viewed in Timeline, Board, or Grid View, giving teams a clear, consistent order for strategic decision-making.

**DATA PROCESSOR** 

### Smarter, Faster Integrations ---Inbound & Outbound

The Data Processor provides a powerful, configurationbased module for creating high-quality inbound integrations without custom code. Supporting universal imports from CSV, Excel, and REST APIs, it enables robust data validation, encryption, batching, and workflow chaining.

Customers can manage and support integrations themselves while reducing cost and complexity, with 90% of Rego's inbound integrations now built on this foundation.

### Connecting the PPM Ecosystem

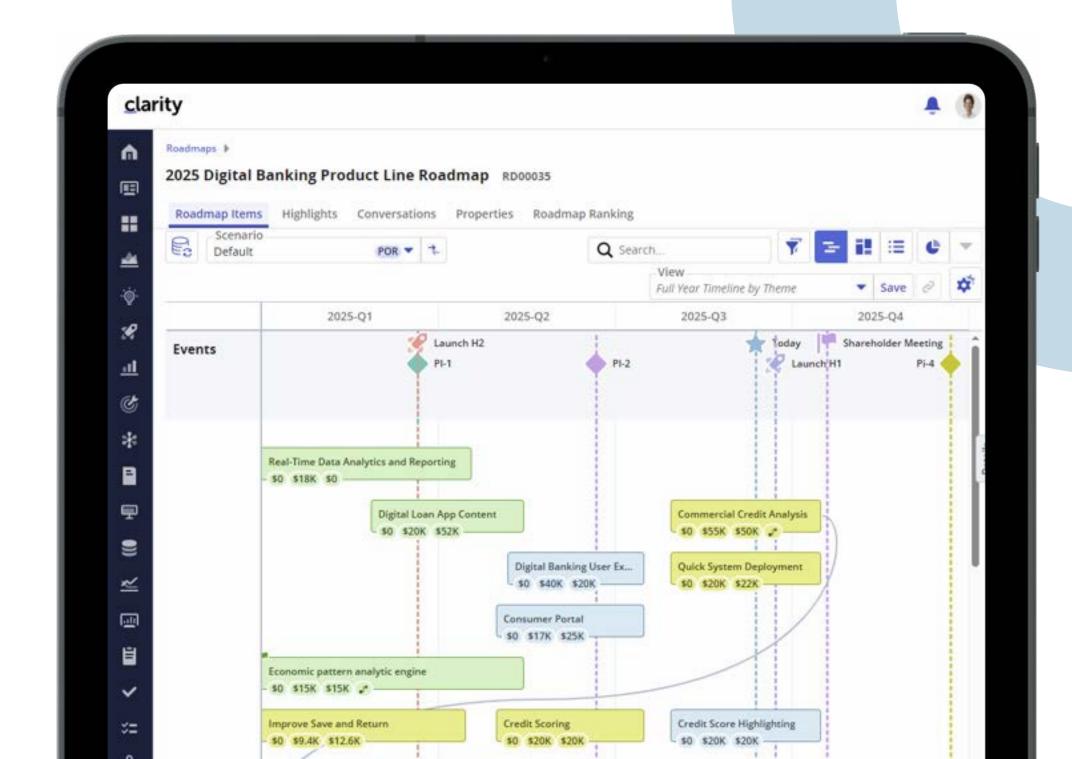

For those not using ConnectALL, Rego's pre-configured connectors link Clarity with hundreds of popular tools, from Agile platforms to collaboration suites. This seamless integration keeps strategy, execution, and reporting connected, reducing manual effort and eliminating data silos.

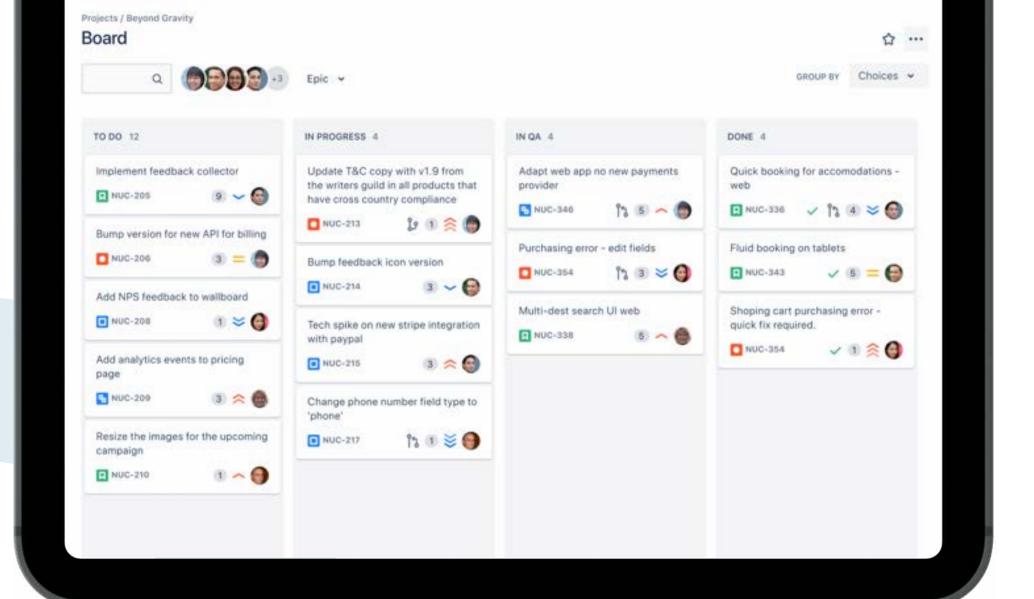

**ROADMAP TO AGILE** 

### Connecting Strategy to Execution

The Roadmap to Agile Connector bridges Clarity and Agile tools, ensuring strategy flows seamlessly into execution.

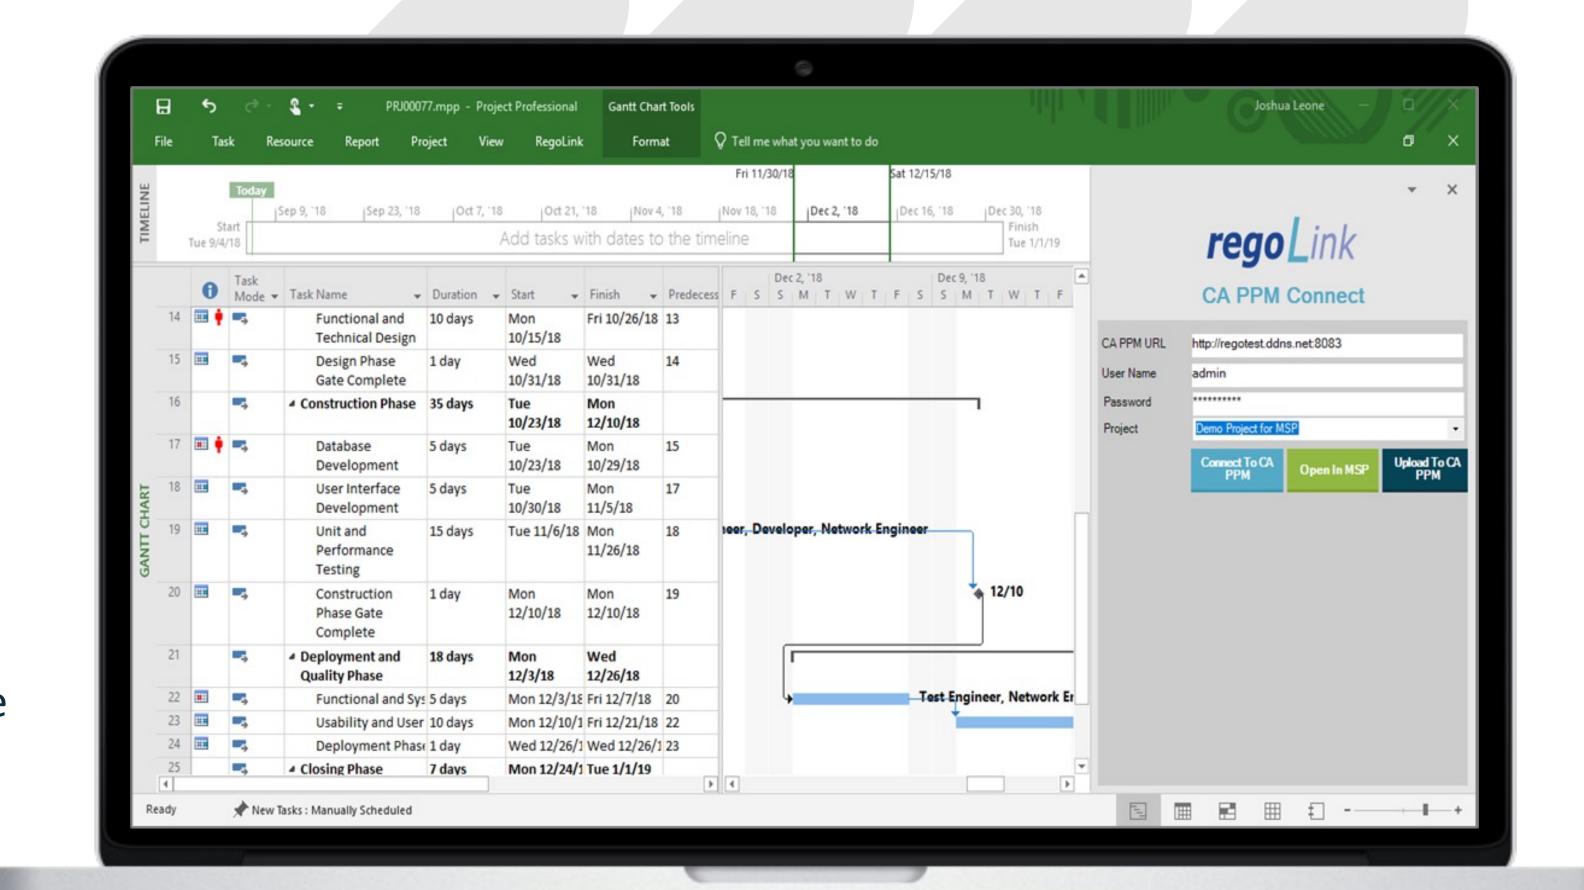

By automatically syncing roadmap items into agile backlogs, it eliminates double entry, reduces errors, and gives leadership real-time visibility into development progress.

**MSP CONNECTOR** 

### Faster, Smarter MSP-to-Clarity Sync

- Free 30 Day Trial
- Saves 200% faster
- Pinpointed error messages on save
- Custom field support
- dynamic lookup value support
- Partial Plan Save just key tasks

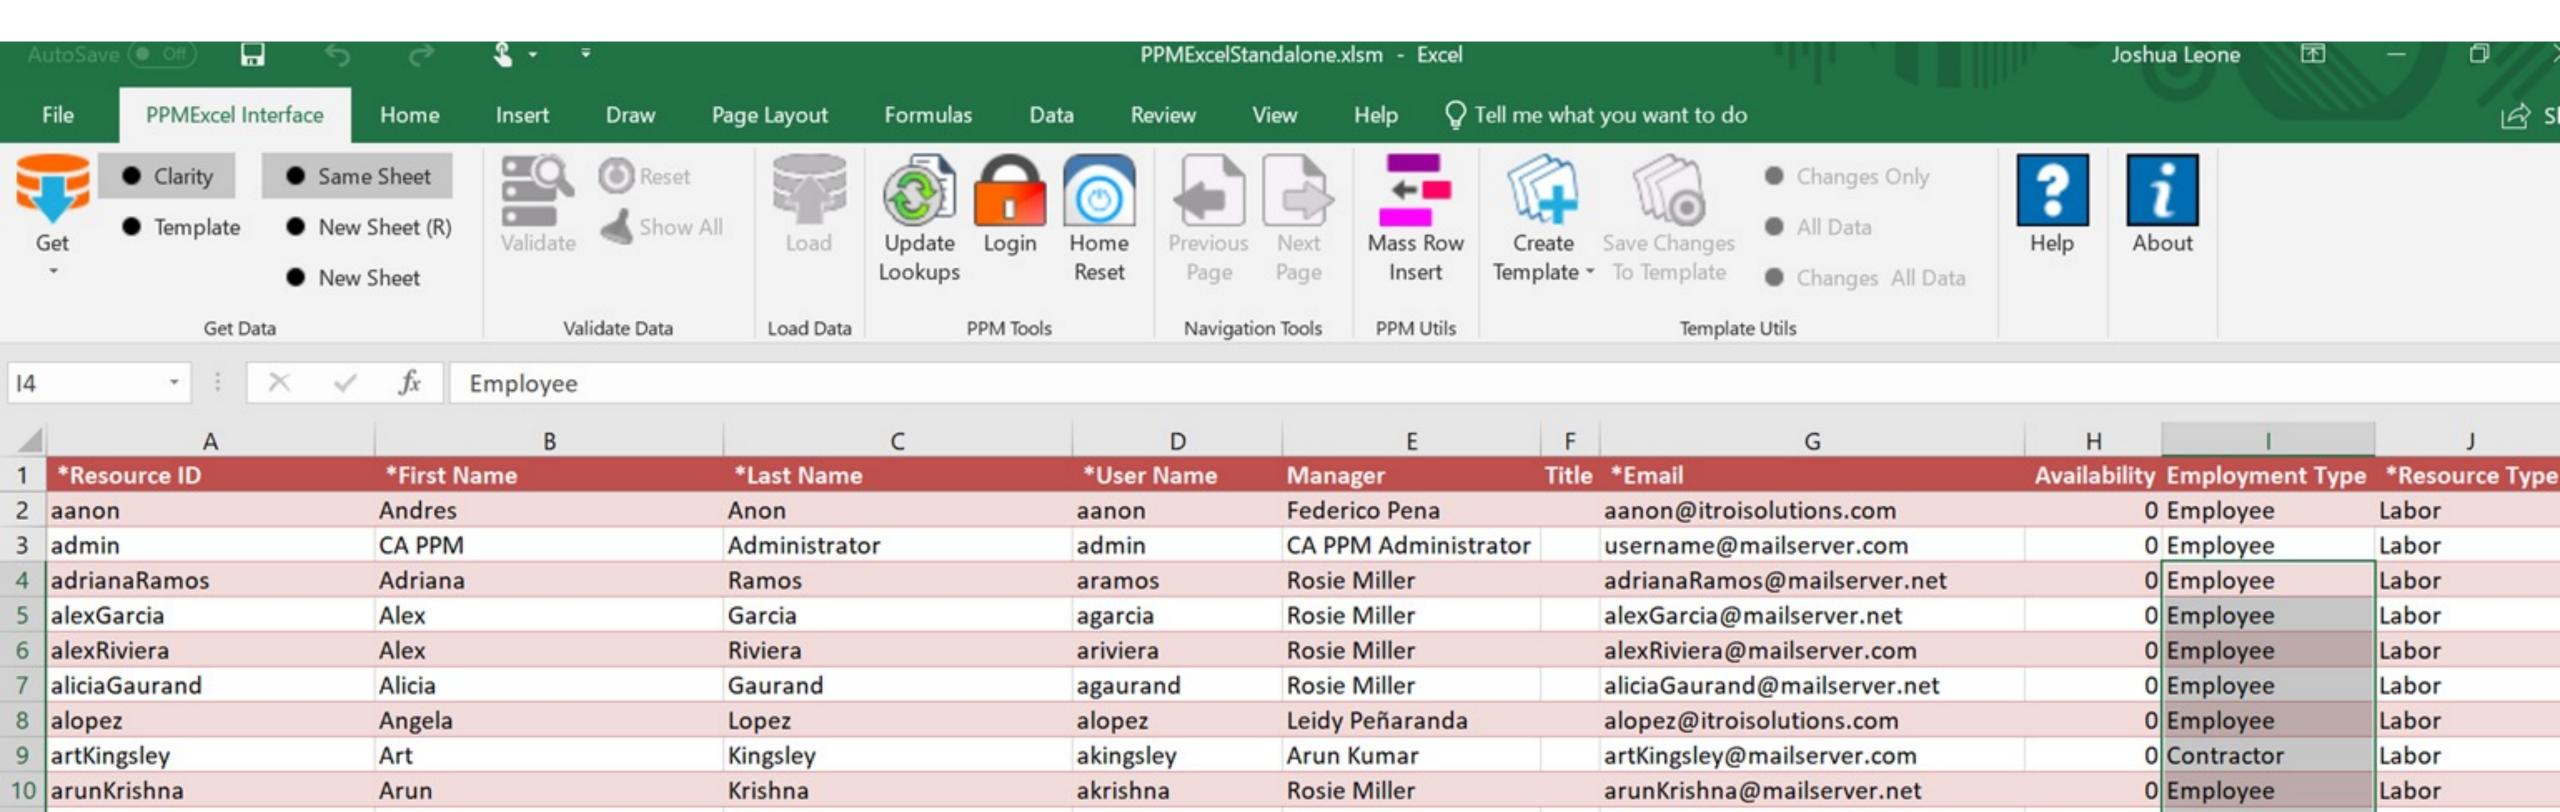

**EXCEL DATA MANAGER** 

## Clarity Data,Managed inExcel

Excel Data Manager allows users to export, modify, validate, and reimport Clarity data directly in Excel with full out-of-the-box support for SaaS and On-Premise environments.

Built-in visual aids highlight valid and invalid records, reducing errors and improving accuracy, while over 20 standard interfaces support common objects such as projects, tasks, resources, and risks.

Where Clarity Meets
The Microsoft 365
Ecosystem

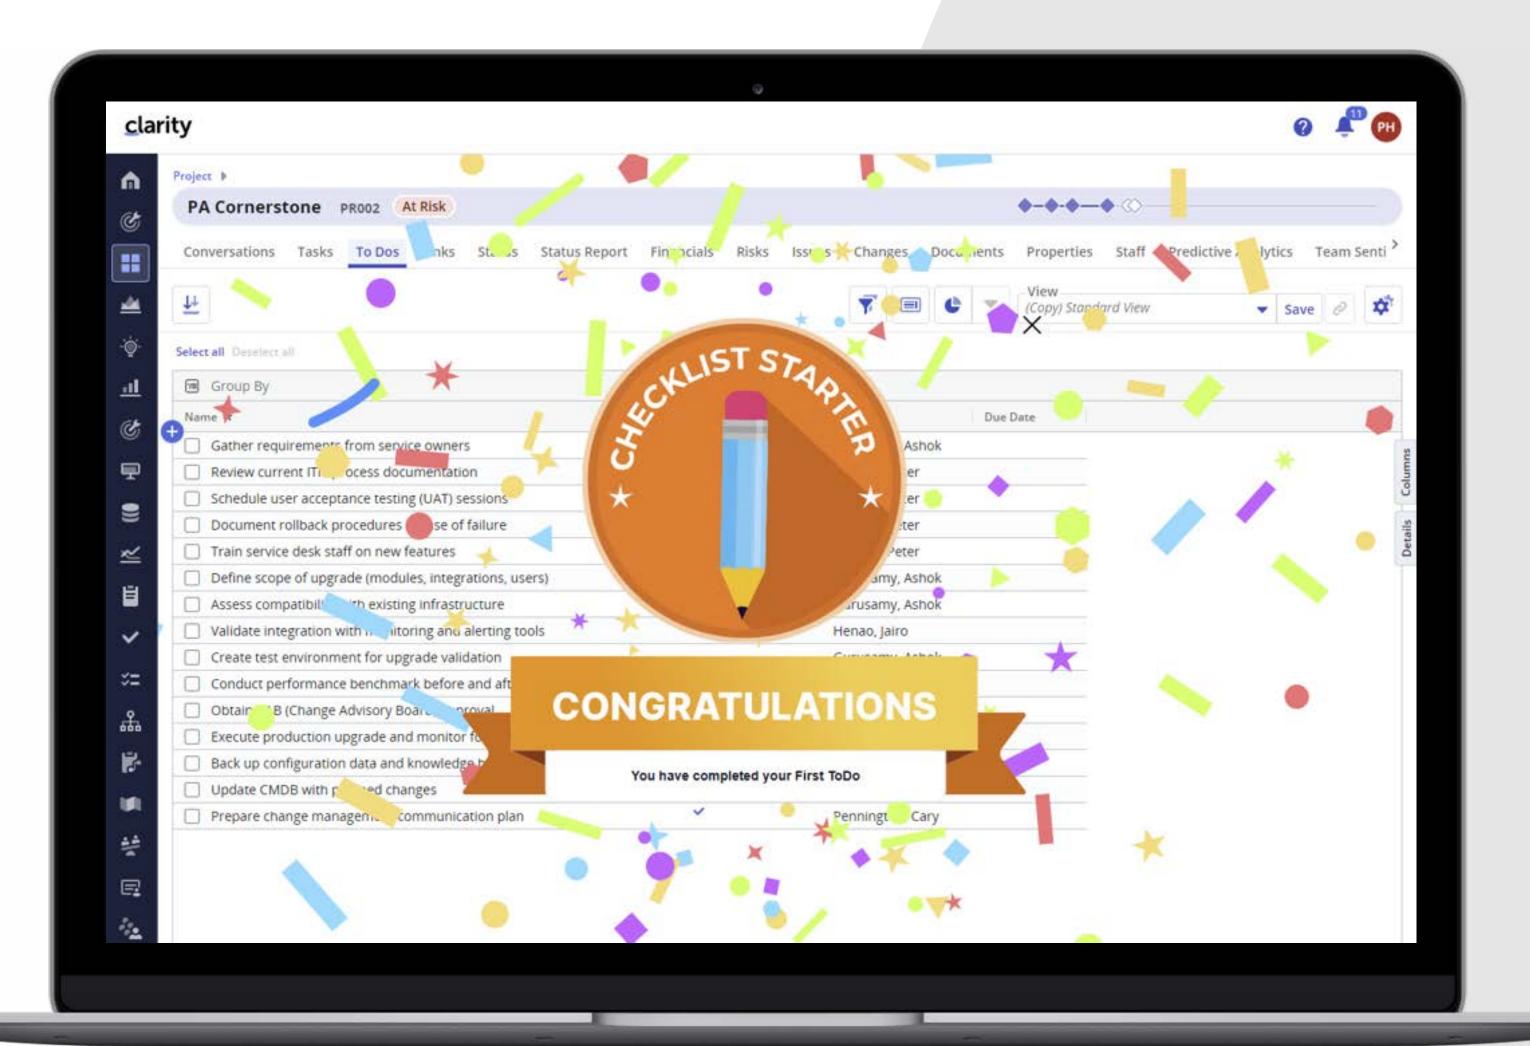

Rego's connectors integrate Clarity seamlessly with Microsoft 365 to bring project and portfolio management into the tools your teams already use every day.

Our Certified Power Automate Connector extends
Clarity into Teams, Outlook, SharePoint, and
PowerPoint, reducing duplicate effort and keeping
data consistent across platforms.

**GAMIFICATION** 

# Increase user engagement and encourage consistent, good behavior

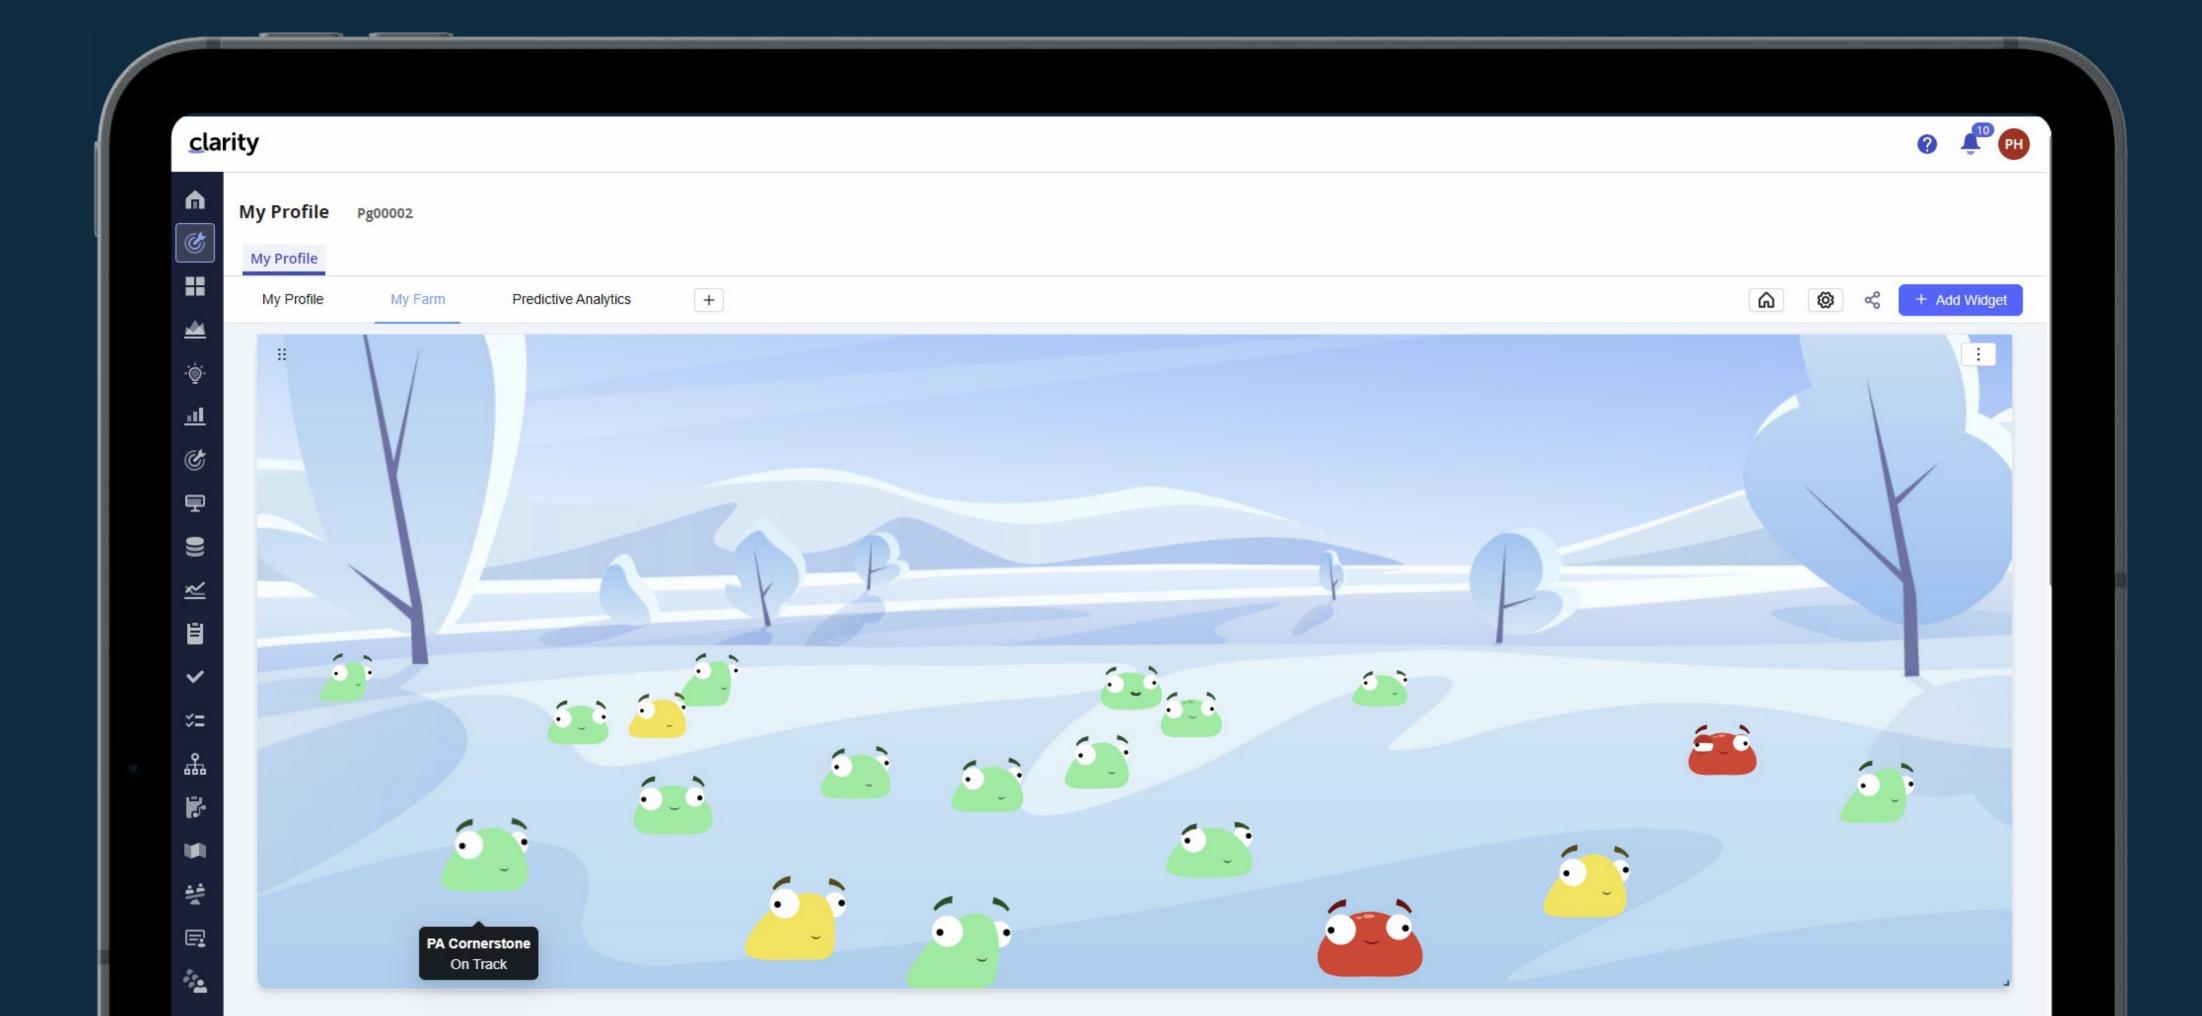

Through **gamification**, we inject purpose and fun into everyday project activities, encouraging collaboration, rewarding progress, and building momentum toward strategic goals.

**GAMIFICATION** 

### Making Work Fun

To boost adoption and daily engagement, Rego introduces playful, rewarding experiences that make work feel less like a chore. Features like the Planimal Farm, where projects come to life as lovable, animated creatures, give users a visual, emotional connection to their work.

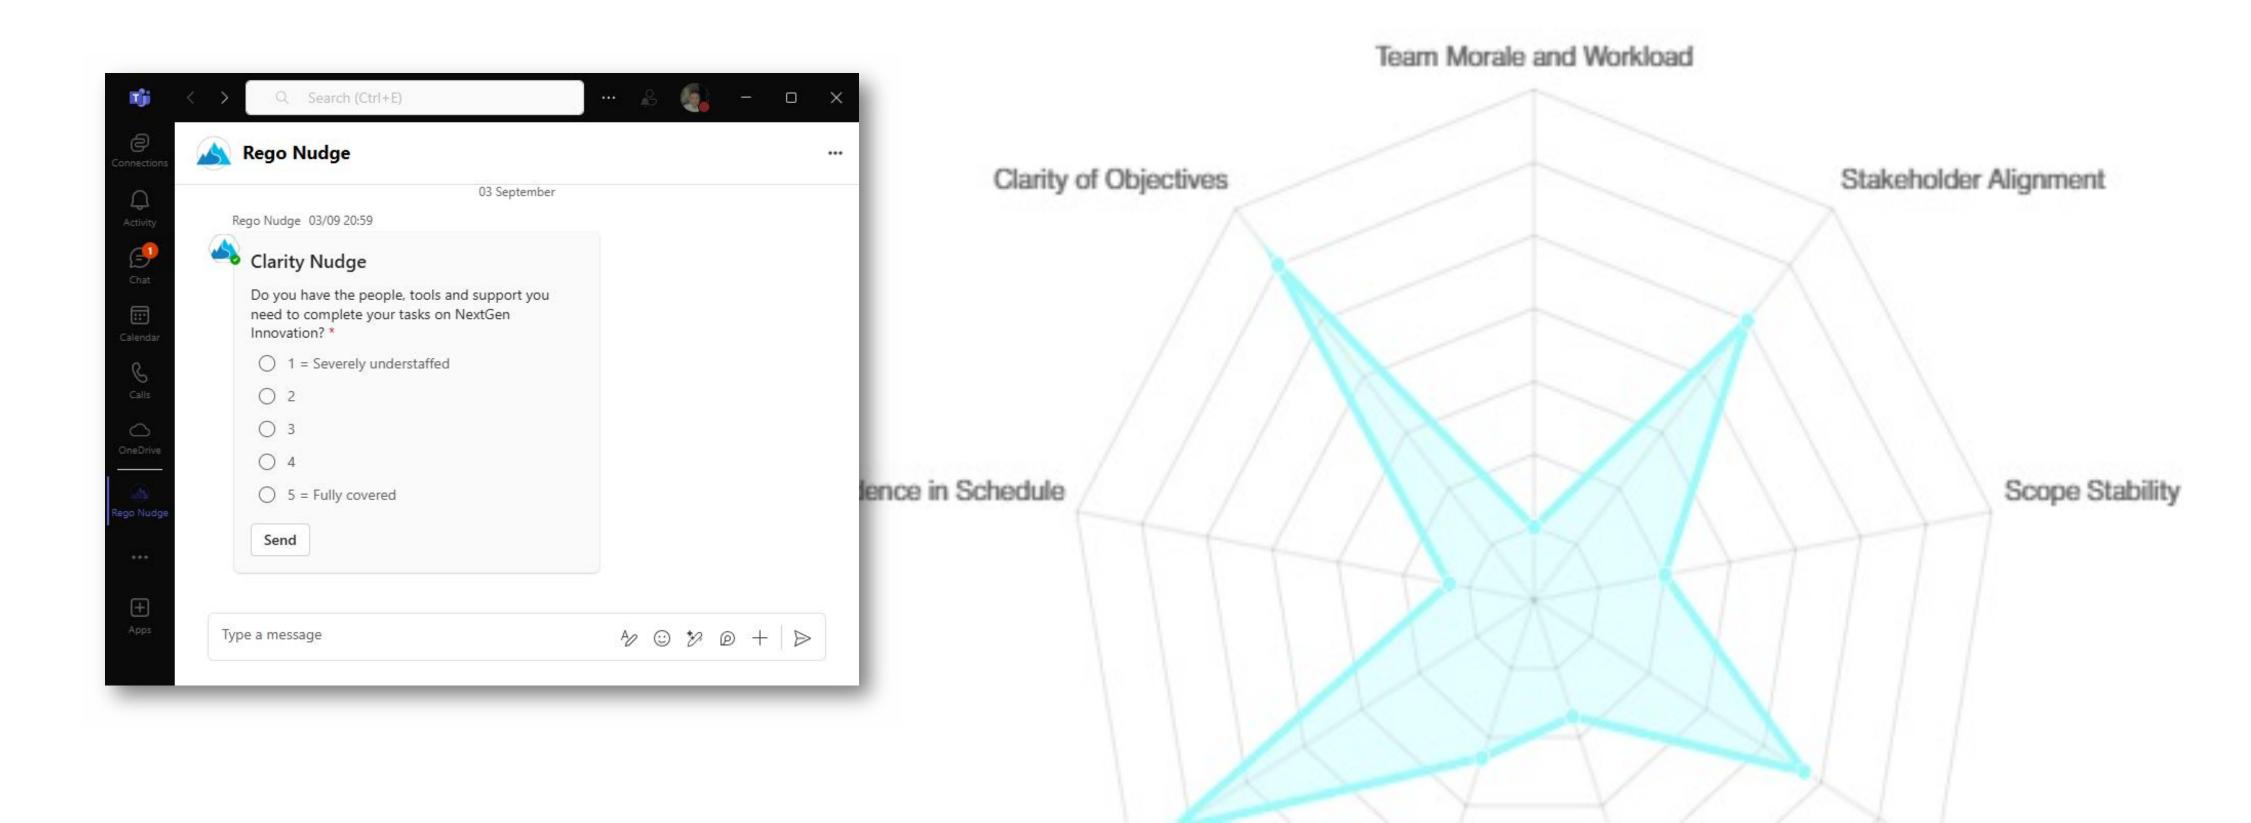

NUDGE

## A New Dimension in Delivery Intelligence

Traditional status reports miss early warning signs because teams are busy and structured updates don't capture true sentiment.

Nudge collects lightweight, real-time feedback from the people doing the work, creating a **Team Sentiment** score that reflects project reality. By surfacing hidden risks and morale signals, Nudge enriches project health assessments and helps leaders act before small issues become big problems.

**PREDICTIVE ANALYTICS** 

### From RAG status to data-driven investment health

The Project Health Indicator unifies insights from Nudge, status report inputs, and other project metrics into a single configurable score.

You can define the right balance between hard data, sentiment, and the project manager's perspective to create the most accurate and trusted view of overall project health.

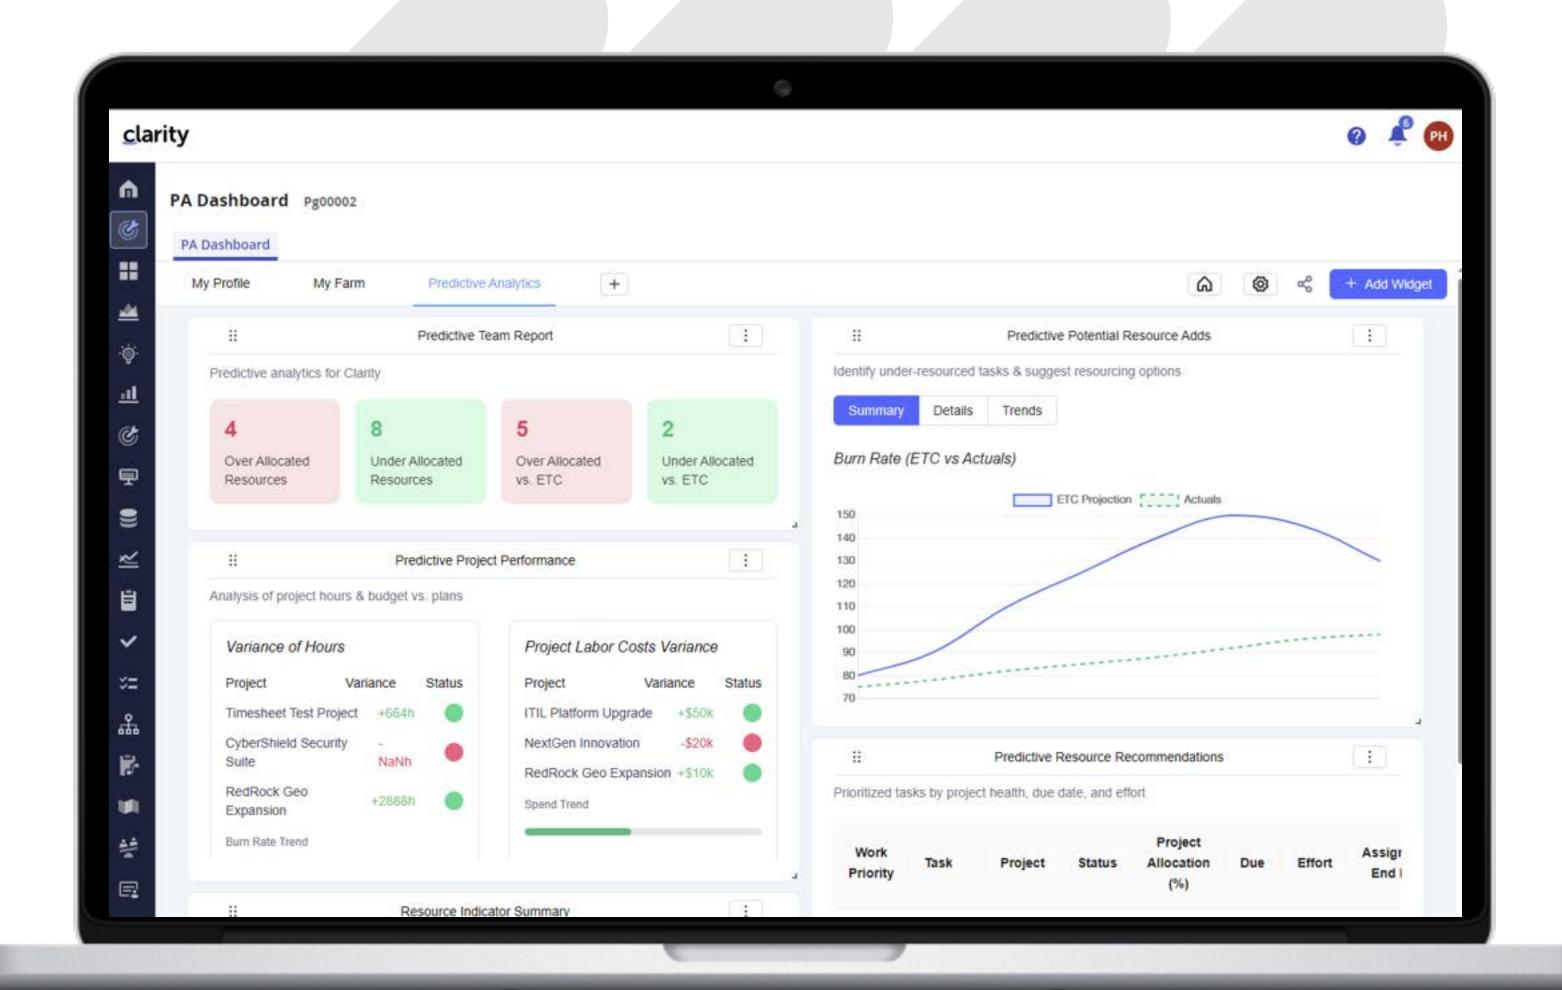

### regoUniversity 2025

# Move from reactive to proactive decision-making

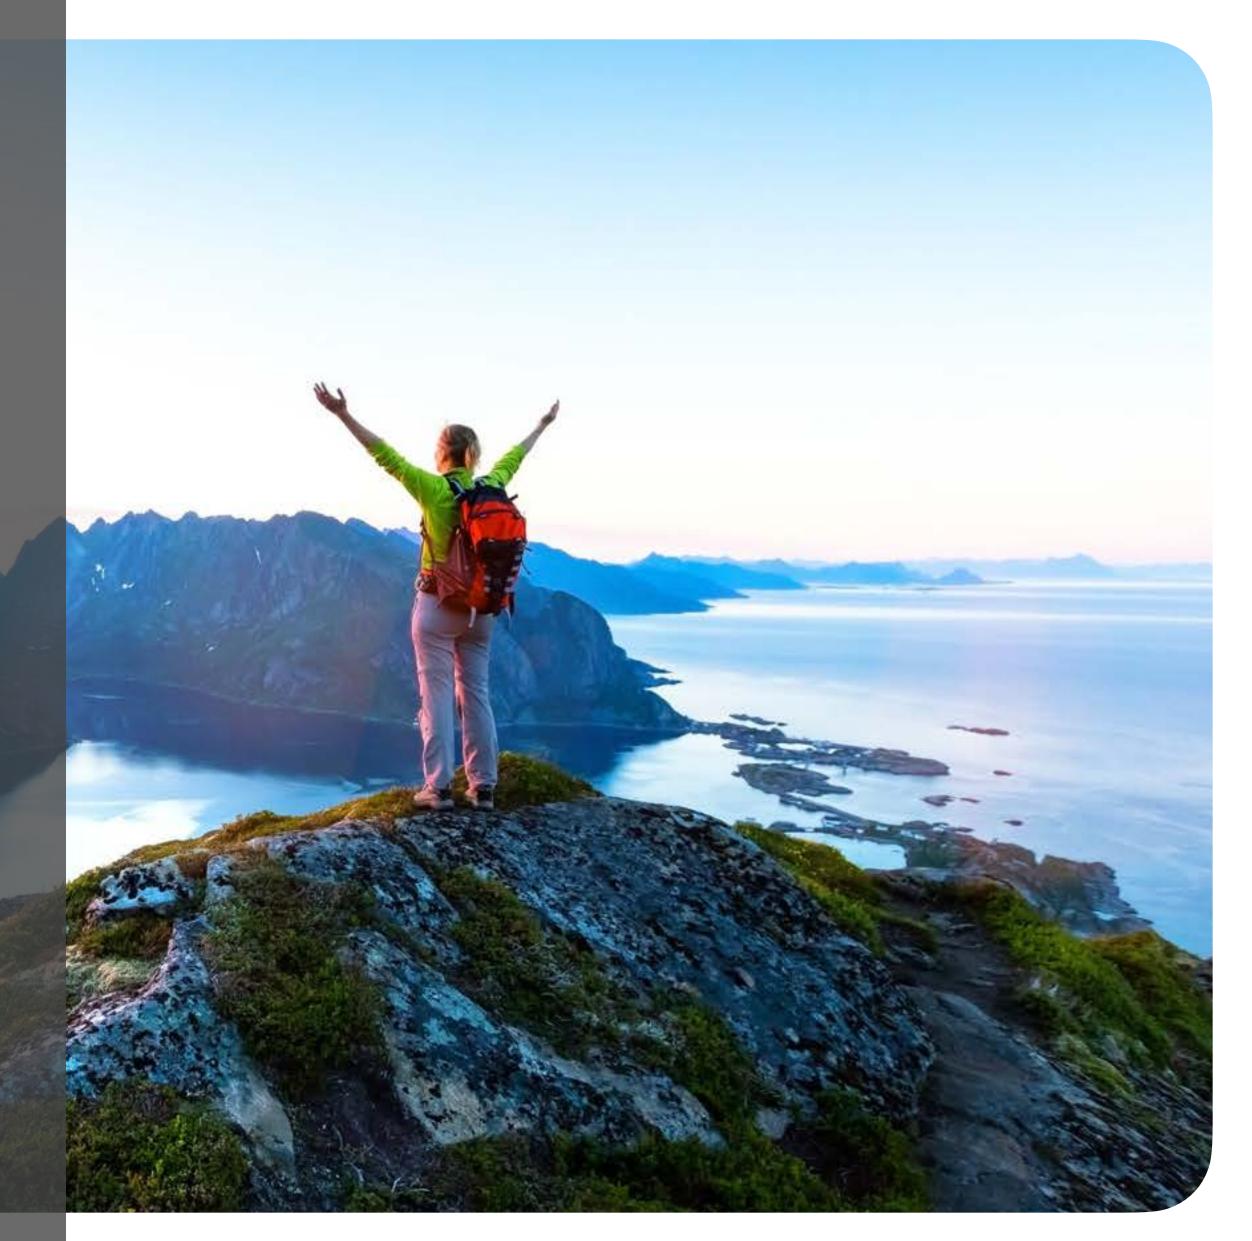

Predictive Analytics empowers leaders with forward-looking insights, anticipating risks, surfacing inefficiencies, and optimizing decision-making based on both hard metrics and behavioral signals.

# Thank You for Being Part of the Journey

Together we've created thousands of solutions and shared them with the Clarity community.

The best is yet to come.
