Why Moventus?

In conversations with our Clarity customers, we learned that some teams use collaborative work management (CWM) tools for simpler work management needs that Clarity does not fully address.

Speaking with active monday.com / ClickUp users **revealed a need** for enterprise features that are not available in these tools – including stronger governance, timesheets, resource management, roadmaps, etc.

Rego decided to build a robust, but simple work management add-on for Clarity that combines the simple and easy to use UX of monday.com / ClickUp with the powerful Clarity enterprise features.

Moventus is that solution. It empowers teams to start with simple work management and have an easy path to mature without having to switch tools.

**Update request**

From: ops.director@company.com
Subject: Project status

Can you update the status
of this project for me?

Not every request starts inside Clarity

The Hidden Cost of Disconnected Intake

- Information arrives incomplete
- PMOs spend time chasing information and rekeying data
- Data quality suffers
- Requests are delayed
- External or occasional users need a simpler route into Clarity
(or bypass the process because it's easier)
