Let Rego Be Your Guide

AWS AI Readiness Security Assessment

Secure Your AI Future – Faster

? Is your AWS environment ready for GenAI?
Generative AI introduces new security risks – faster and more dangerous than ever before.

aws **PARTNER** AWS Control Tower Delivery

aws **PARTNER** Advanced Tier Services

aws **PARTNER** Well-Architected Partner Program

aws Qualified Software

Rego helps you protect AI investments – fast

Rego's AWS AI Readiness Security Assessment validates your cloud infrastructure and data pipelines *in just hours.* We pinpoint AI-specific vulnerabilities and deliver a clear, prioritized remediation plan – empowering you to move forward with confidence.

What Risks does AI bring?

⚠ AI threats are evolving faster than traditional security tools

⚠ Zero-Day risks target AI training data and LLM models

⚠ GenAI workloads carry *higher rates of critical vulnerabilities*

⚠ Traditional security assessments take *weeks* and multiple teams

How Rego Mitigates AI Risk

⚙ **AI Review Ready in Hours, Not Weeks**
Accelerated infrastructure review shortens time-to-market for GenAI

⚙ **AI-Specific Threat Detection**
Spot risks like model extraction and data poisoning before they strike

⚙ **Compliance-Ready Architecture**
Align with GDPR, HIPAA, SOX, and more, using secure-by-design principles

⚙ **Cost-Optimized Security Controls**
Reduce security overhead *by up to 40%* with right-sized protections

⚙ **Future-Proof Frameworks**
Scalable security that grows with your AI roadmap

Value to You

Faster AI Adoption: Deploy sooner with guided remediation

Reduced Risk: Prevent breaches and audit failures before they happen

Expert Guidance: AWS-certified consultants with 10+ years' experience

Outpace Competitors: Move faster with stronger AI security posture

What You'll Get

Tailored AI Security Report using AWS Well-Architected framework

Remediation Roadmap with timelines and resource estimates

Best Practices for model security and pipeline protection

Your Assessment Snapshot

3-hour engagement with AWS Admin

Must be an AWS customer

Includes custom Security Next Actions report and Remediation Roadmap
