Let Rego Be Your Guide

Amazon Quick Suite Accelerator

Fast-Track Organizational
AI Transformation

In just 4 – 8 weeks, transform your business with **Rego Consulting's Amazon Quick Suite Accelerator**, a comprehensive program designed to quickly deploy AWS's most powerful AI and analytics capabilities.

Leverage proven methodologies that deliver measurable business outcomes through intelligent automation, advanced analytics, and agentic AI implementation

Address the critical challenge of enterprise AI adoption by providing hands-on expertise, real-world configuration, and sustainable adoption frameworks in weeks

Get immediate value and demonstratable ROI in weeks rather than lengthy implementation cycles that can stretch for months

What You Can Expect

We collaborate by balancing strategic planning with hands-on implementation. Our program operates on an Agile, assessment-driven methodology. We prioritize understanding your business before diving into technical configurations. That puts you in the driver's seat – ensuring we're doing what matters for your organization.

Three-phased Flow Approach and Deliverables

Because we embrace Agile methodology, we'll remain adaptive and flexible, refining approaches based on meetings during the assessment phases. Solutions are tailored, relevant, and deployed within the accelerated timeline framework.

Phase 1: Discovery Sessions (Week 1 – 2)

Map your current landscape, identify high-impact use cases, and establish clear success metrics that align with your business objectives.

- Conduct Quick Suite scope definition workshop covering all five components: Quick Sight, Quick Flows, Quick Automate, Quick Index, and Quick Research
- Provide comprehensive enterprise data source assessment (structured and unstructured)
- Conduct organizational readiness evaluation for agentic AI adoption
- Define success metrics and KPI framework development

Phase 2: Hands-On Configuration Support and Proof of Concept (Week 3 – 4)

Rego's consultants work alongside your team, ensuring knowledge transfer while building production-ready solutions.

- Provide hands-on onboarding and platform training for stakeholders
- Configure Quick Suite components, tailoring to business needs
- Provide proof-of-concept development for 2 – 3 high-impact use cases
- Set up security controls and integration

Phase 3: Adoption and Value Realization (Week 5 – 8)

Together, demonstrate immediate value and ROI and ensure ongoing success.

- Provide structured user adoption and change management support
- Measure business value and analyze for ROI
- Provide operations planning and governance framework
- Develop future state roadmap
- Hold twice weekly standup calls to keep all team members engaged and leverage Agile workflows throughout the transformation

Resources Needed and Team Involvement

Our Agile approach means commitment from your team and leadership is purposeful, setting your company up for long-term success.

Executive Sponsor Participation:

Leadership participates in key milestones and strategy sessions to maintain alignment

Technical Team Dedication:

IT and data teams collaborate closely with Rego Consultants

Business User Training:

Structured onboarding enables smooth adoption that maximizes platform value

Change Management Support:

Comprehensive communication and training support ensure successful transitions and user acceptance

Why Rego and Quick Suite Accelerator

Helping companies embrace digital transformation and ordering chaos is what Rego Consulting has been excelling at for 18 years. Our guides are Amazon experts, iterating with you to give you the most value with proven technologies and methodologies. We collaborate with you, training your teams, and managing change; the goal of every Rego project enables your teams to replicate our success. Plus, we move fast, leaping from AI opportunity to measurable impact within 4 – 8 weeks. The Rego Consulting Quick Suite Accelerator bridges the gap between objective and outcome for sustainable and intelligent automation and growth. It puts your AI initiatives on the fast track.
