Let Rego Be Your Guide

AWS DevOps Pod

The DevOps Pod is designed to help your business build, run, and optimize your AWS cloud infrastructure without the cost of hiring experienced, full-time employees.

Rego's AWS-certified team will guide you on your cloud journey, offering the expertise you need for AWS design, implementation, enhancements, and ongoing support. Whether you're looking to optimize costs, improve security, or drive cloud innovation, Rego's DevOps Pod delivers hands-on consulting that aligns with your unique business needs, so that you can focus on growing your business.

Why Choose Rego's DevOps Pod?

-  **Expert Guidance On-Demand:** Rego's AWS-certified experts will help you navigate complex decisions and ensure your cloud environment is optimized for performance, security, and cost efficiency.
-  **Affordable & Flexible:** For just **\$2500** a month, you will leverage Rego's expertise without the overhead of a full-time hire. You can also cancel at any time.
-  **Drive Down Cloud Costs:** Our cloud guides typically reduce cloud spending by **20-30%** within the first months using strategic planning of Reserved Instances, Savings Plans, and other AWS cost optimization tools.
-  **Improve Security & Compliance:** Monthly Well-Architected reviews and bi-weekly scrums meetings ensure adherence to best practices, keeping your cloud environment secure and reliable.

Deliverables

-  **AWS-Certified Dedicated Team:** Get continuous support from an AWS-certified Cloud Guide and a Solutions Architect dedicated to your success.
-  **On-Demand Consulting Hours:** Receive 10 hours of monthly hands-on consulting to tackle your unique cloud challenges and help you reach your goals.
-  **Monthly Well-Architected Pillar Reviews:** Optimize your infrastructure and remediate High-Risk Issues in key areas including Cost Optimization, Security, Performance Efficiency, Reliability, Performance Efficiency, and Sustainability.
-  **Bi-Weekly Scrum Meetings:** These regular check-ins are designed to help you learn advanced AWS best practices and ensure that your most valued initiatives are advanced.

Benefits To Help You Grow

-  **Streamline DevOps:** Rego's AWS-certified professionals act as an extension of your team. They will form a deep partnership with you to enhance your cloud posture and help you adopt modern DevOps methodologies.
-  **Mitigate Risks:** Stay ahead of cost inflation, security threats, and compliance with Rego's continuous oversight and AWS best practices.
-  **Focus on What Matters:** By offloading AWS management tasks, your IT team can concentrate on core business initiatives, driving growth and innovation.
