Let Rego Be Your Guide

Lean-Agile Center of Excellence Enablement

Have you established your Enterprise Lean-Agile Center of Excellence?

The Lean-Agile Center of Excellence (LACE) is a small team of people dedicated to implementing the SAFe (Scaled Agile Framework) Lean-Agile way of working for an Enterprise.

Creating and supporting a strong LACE is a key differentiator in companies who successfully launch, scale, and evolve their SAFe transformations. Without a LACE, organizations may fail to sustain their Agility progress, and fall back into their former culture and old practices.

Implementing, equipping, and supporting a LACE in a SAFe organization brings significant benefits to the business, increases organizational agility, improves collaboration and communication, standardizes Agile practices, increases ROI, and drives continuous improvement.

Rego will help your organization establish a LACE and provide training for every role. This helps your organization:

- Accelerate Time to Market
- Align Enterprise Strategy to Tactical Delivery
- Predictably Deliver Value
- Lower Risk
- Increase Collaboration
- Better Align to Business Needs

- Increase Visibility in the Solution Development Lifecycle
- Increase Customer and Employee Experience
- Dedicate More Time to Innovation
- Promote a Culture of Continuous Learning and Improvement

LACE Enablement

Our senior Agile enterprise practitioners understand that every organization's needs are different. With over 100 years combined real-world implementation experience, they have the skills, knowledge, and passion to partner with you to tailor a Roadmap for your LACE's success. Services include:

An assessment of your current state

Guidance and support in establishing your own LACE or revitalizing your existing LACE

Creating a roadmap to grow and accelerate your LACE for long-term success

Coaching to avoid common pitfalls and support your organization's journey to Business Agility

Access to our sizable library of existing Agile resources that is configurable for your organization's "flavor" of Agile framework

Time Frame and Requirements

3-6 months

Requires executive sponsorship of scaling Agile in your organization
