

FinOps Maturity and Operating Readiness Assessment

Turn cloud cost visibility
into cloud cost accountability

rego consulting

**Cloud cost visibility is only the beginning.
Accountability is where value starts.**

Take advantage of 10 free hours of FinOps guidance from Rego Consulting.

Rego's [FinOps Maturity and Operating Readiness Assessment](#) evaluates your current FinOps operating model against the FinOps Crawl-Walk-Run maturity framework. You'll understand how your organization performs across visibility, ownership, forecasting, governance, and tooling, then receive clear recommendations to strengthen accountability and improve cloud financial operations.

Are Cloud Costs Moving Faster Than Your Process?

- \$** Cloud spend grows without clear ownership across teams, products, or business units.
- \$** Billing data exists, but it is difficult to organize into meaningful decisions.
- \$** Forecasting and budgeting are reactive or inconsistent.
- \$** Incomplete tagging reduces confidence in showback, chargeback, and cost allocation.
- \$** Finance, Cloud Ops, and Engineering do not always share one operating rhythm.
- \$** Existing tools may show spend, but teams may still lack the processes, ownership, or reporting needed to act on it.

Key Assessment Areas

- > Understand:** Cloud usage, cost visibility, and the stakeholders who can drive action.
- > Quantify:** Cloud spend aligned to business value and unit economics.
- > Allocate:** Cost assignment to teams, products, and business units.
- > Optimize:** Evidence-based opportunities to reduce waste, improve efficiency, and strengthen discount strategies.
- > Operate:** Repeatable FinOps processes, operating rhythms, and review cadences.
- > Manage:** Governance, accountability, and organizational alignment.

What You'll Receive

- FinOps maturity scorecard.
- Gap analysis across people, process, technology, and governance
- Targeted quick-win opportunities, tailored to your organization's highest value use-cases.
- Executive-ready phased FinOps roadmap with prioritized recommendations.

Value for Your Organization

- Improve accountability across Finance, Cloud Ops, Engineering, and leadership.
- Strengthen forecasting, budgeting, and governance.
- Focus teams on the highest-impact optimization opportunities.
- Turn cloud cost data into cloud financial discipline.
- Clarify whether IBM Apptio Cloudability can support your next steps.

Scope of Assessment

A focused, Rego-led evaluation. Typical activities include stakeholder discussions, review of current FinOps processes and reporting, evaluation of tagging, forecasting, allocation, governance, and tooling practices, plus a readout with findings and recommended next steps.

Level of Effort Summary

Level of Effort Summary

Phase 1

Phase 2

Phase 3
