

Clarity Forms

Capture requests directly in Clarity

Give people a straightforward way to submit ideas, requests, requirements and proposals without requiring every respondent to be a Clarity user. Each submission creates structured information in Clarity, ready for the processes and reporting your teams already use.

rego consulting

Benefits of Forms

Stop re-entering information

Collect information directly from the person instead of copying it from emails, documents or chats into Clarity.

Get the right information from the start

Use structured fields, validation and conditional sections to collect the information your team needs.

Extend intake beyond Clarity users

Collect information from a wider group of people without requiring every respondent to have a Clarity account.

Keep submissions connected to Clarity

Create Clarity records directly from form submissions, without needing a separate integration.

Included Features

Build and preview

Drag-and-drop tabs, sections, and fields with live preview.

Reuse layouts

Start from scratch or import supported Clarity Blueprints.

Guide responses

Apply field validation and conditional tab and section visibility.

Brand and manage

Customize colors, banners, and messages; duplicate or archive forms.

Track engagement

Track submissions and engagement over time.

Control How People Access Each Form

Choose the access method that fits the form and its audience.

Clarity authentication

Require respondents to sign in with a Clarity account.

One-time passcode (OTP)

Require respondents to verify a code before completing the form.

Public link

Allow anyone with the form link to respond without signing in.

Technical Prerequisites

Hosting

GCP, AWS, and on-premises compatible.

Clarity Version

Compatible with Clarity 15.1 and later using the Modern UX (MUX).

Get started

Bring an intake use case to your next Rego conversation and explore how Clarity Forms can fit your team's process.
