

Clarity MUX Migrator v2.0

Automated Migration for Clarity Blueprints, Views, and Field Level Security
Ability to push default views to Resources, Security Groups, and OBS Units

Does thinking about manually migrating your Clarity blueprints, views, and field level security stress you out? Rego Consulting's MUX Migrator can help.

Rego's Clarity MUX Migrator:

Creates packages of one-to-many components (Blueprints, Views, and FLS) for automated migration from one environment to another

- This can be accomplished through environment to environment communication or by utilizing a JSON export/import

Keeps Clarity user experiences consistent between environments

Easily keeps track of and migrates your most popular blueprints and views for new Clarity releases

Define and reset default grid views across objects for your end users

Skip The Headache and Go Automated

- Save Time
- Minimize Errors
- Seamless User Experience Migration for New Releases
- Make Keeping Your Instance Up-to-Date Easier
- Reduce Administrative Maintenance

Get Started

- The MUX Migrator v2.0 and it's staging table are available for free on the RegoXChange
- Works with Clarity v16.1.0+
- The only associated cost is for a few hours of configuration time
