Clarity MUX Migrator

Automated Migration for Clarity Blueprints, Views, and Field Level Security

Does thinking about manually migrating your Clarity blueprints, views, and field level security stress you out?

Rego Consulting's MUX Migrator can help:

- Creates packages of one-to-many components (Blueprints, Views, and Field Level Security) for automated migration from one environment to another

- Keeps Clarity user experiences consistent between environments

- Easily keeps track of and migrates your most popular blueprints and views for new Clarity releases

Skip The Headache and Go Automated

Benefits of Automated Migrations

- Saves Time

- Minimizes Errors

- Creates Seamless User Experiences with New Releases

- Keeps Your Clarity Instance Up-to-Date Easier

- Reduces Administrative Maintenance

Get Started

We provide the MUX Migrator and its staging table for **free** via RegoXChange. Our Rego associates are available to help you with configuration and setting up of the migration process for only a few billable hours.
