Let Rego Be Your Guide

Connect Clarity to Office 365

Seamlessly integrate Clarity to Office 365 with the RegoLink
Power Automate Connector

Powered by **regoLink**

Need to eliminate routine and manual tasks?

Looking for ways to increase staff efficiency and effectiveness?

Do you manage your project
collaboration, assets, and documents on
Office 365?

Automate tasks and connect applications with the RegoLink
Power Automate Connector

Drives greater efficiency, accuracy, and effectiveness

Automated flows and synchronization enhance collaboration, approvals and notifications to Office 365, MS Teams, SharePoint, Outlook and more.

Simple, cost-effective integration with your application ecosystem

Within the Power Automate ecosystem with more than 500+ connectors.

- ✓ Leverage Microsoft Power Automate Flows to automate routine processes
- ✓ Easy to create or modify flows and solutions
- ✓ Reduced development times
- ✓ Lower cost support compared with custom solutions
- ✓ Aid adoption with user-friendly processes

Features

-  Can be used for approvals, notifications, updating or creating Clarity data.
-  Syncing of data between MS applications and Clarity
-  Seamlessly trigger flows from Clarity Processes
-  Document Manager - seamlessly visualize files stored in Teams or SP inside the Clarity UI

Real-World Uses

Seamlessly create SP Sites, Document Libraries or MS Teams for your Clarity Projects and access them seamlessly through Document Manager

Sync Risk, Issues, Change Requests or even custom objects for stakeholders to view them through SharePoint or MS Teams

Upload scheduled Clarity Reports to SharePoint or MS Teams

Capture Investment Intake through MS Forms or Power Apps, into Clarity.

Outlook Out of Office Events as Clarity Resource Availability
