Rego Adoption Metrics

Improve Project Outcomes by Measuring and Enhancing PPM Adoption

? Are you struggling to ensure that your projects are delivered on time and within scope? Do you find it challenging to pinpoint why deadlines are missed or resources are overstretched?

Rego Adoption Metrics provides powerful insights by measuring critical project and resource attributes, ensuring that your teams follow key protocols to drive better project delivery and decision-making.

regoconsulting

This tool helps you address key questions like:

Are my project managers regularly updating status reports and managing risks?

Are project managers creating Milestones / Key Tasks and keeping them up to date?

Are project schedules being effectively managed (e.g., are baselined dates accurate)?

Are Risks and Issues actively managed within the project, using specific data fields?

Are resource managers ensuring that time is posted accurately and promptly?

Do resource allocations match actual work?

How Rego Adoption Metrics Solves the Problem:

With 29 pre-defined metrics tracking project and resource adoption, Rego Adoption Metrics helps you monitor your teams' adherence to best practices, improving both project outcomes and data reliability.

You'll gain insights that go beyond simple tracking. Understand how your team is using Clarity PPM and take targeted actions to enhance overall performance.

Key Benefits:

Improve Data Quality:
Make better, more informed decisions with accurate, up-to-date data.

Understand Organizational Maturity:
Gain visibility into how well your team adopts PPM practices and take targeted steps for improvement.

Enhance Project Delivery:
Align resource management and project protocols with business goals to improve delivery outcomes.

Features:

Customizable Metrics:
29 pre-defined metrics with the option to add or modify rules for your specific needs.

Portlets and Power BI Dashboards:
Easily visualize and track adoption metrics to make informed decisions.

Take Action Today!

The Rego Adoption Metrics module is available through RegoXchange under the Basix package. Rego Consulting also offers expert support to help install and modify metrics or views according to your organization's needs.
