Struggling to keep Clarity data updated across systems?

Need a faster, more accurate solution?

Simplify Clarity updates by letting your teams work in familiar platforms like Excel.

## Save time and ensure data consistency with the Excel Data Manager for Clarity

- ✓ Empower business users to update Clarity data through Excel – no Clarity expertise needed.
- ✓ Improve accuracy, reporting, and adoption with real-time validation and familiar tools.

### Excel-Based Interface

Business users can load and update data to API-enabled Clarity objects, eliminating the need for complex technical interventions.

**Configurable to Your Needs** Flexible templates and configurable business rules to match your unique requirements.

### Boost Productivity

Reduce time spent on data management tasks and enable teams to work more efficiently.

### Bulk Updates Made Easy

Mass-update records with full lookup support – no more tedious manual entry.

### Real-Time Validation

Ensures data accuracy before updates are committed, preserving Clarity as your single source of truth.

**Single Sign-On Support (SSO)** Seamless authentication for a smooth and secure experience.

*Project Name	*Project Id	Manager	Status	*Is Active	Is Template	Template	*Start Date	*End Date
