Let Rego Be Your Guide

Microsoft SharePoint External Sharing Assessment and Roadmap

Identify Quick Wins, Ensure Safety, and Increase Collaboration with SharePoint

Does your organization need to reduce security threats like data breaches, phishing attacks, and unauthorized data access?

Do your external users need to understand your processes and tools so they can collaborate more efficiently?

Optimizing SharePoint for external sharing can:

Improve Security and Control

Enhance Collaboration

Streamline Communication

Increase Productivity

Assessment and Roadmap

Get a tailored, best practice plan for successful and safe external sharing, including:

2-Week Assessment to identify what files are currently shared externally and overall configuration of sharing in the organization

Tailored Roadmap with secure strategy for sharing content with external users in Microsoft SharePoint, including quick wins, goals, policies, and procedures

Governance and Security Framework Guidance to ensure secure external sharing, such as configuring permissions and security settings to protect sensitive data

SharePoint Configuration and Setup including defining settings, setting up links, and determining shareable content

Training for staff to understand and use external sharing features

Best Practice Documentation and Guidelines for staff to reference as needed
