

Rego & ReluTech

Don't Wait to Migrate, Move to the Cloud Painlessly & Affordably Today

Don't wait until your next datacenter renewal to start your cloud journey. ReluTech bridges the gap between your cloud and datacenter, while Rego expertly navigates your migration and beyond. We help you cut AWS migration and maintenance costs while setting you on the path to success.

ReluTech Flexible Cloud Transition

Creative Cloud Financing

- Turn capital expenses into operational expenses
- Immediate cash infusion up to the book value of your IT equipment
- Monthly service fees for operating the equipment during the transition
- Hardware purchase on all decommissioned assets

Elastic Maintenance Services

- Customized maintenance solutions with up to 90% savings over OEM prices
- Flexible, scalable maintenance options tailored to your needs

IT Asset Disposition (ITAD) Services

- Secure and compliant disposal of IT assets
- Data destruction, recycling, and remarketing

Third-Party Maintenance (TPM) Services

- Cut legacy infrastructure costs by up to 50%, compared to OEM prices
- Get into the cloud faster by redirecting these savings toward migration efforts
- Maintain critical on-prem infrastructure during your migration

Rego Consulting Migrate and Scale

Cloud Migration Services

- Gain migration funding through the AWS Migration Acceleration Program
- Assess, mobilize, migrate, and modernize your infrastructure, using AWS best practices
- Migrations performed by senior AWS-certified experts for fast, scalable, and long-term cloud success
- AWS Infrastructure designed with security best practices at its core

Automated AWS Well-Architected Framework Review

- Assess your infrastructure pre-migration using AWS's 6 Well-Architected Pillars: Security, Cost Optimization, Operational Excellence, Reliability, Performance Efficiency, and Sustainability.
- Identify how to best migrate and resolve high-risk issues to ensure a strong cloud foundation.
- Rego's Automated AWS Well-Architected Reviews take 90% less time than completing manually

AWS DevOps Pod

- Build, secure, maintain, and optimize your AWS cloud infrastructure without the cost of hiring experienced, full-time employees
- Flexible and affordable options based on your needs
- Get expert guidance on demand

AWS Control Tower Assessment and Accelerator

- Assess, enable, deploy, and govern a well-architected, multi-account AWS Control Tower environment
- Deploy AWS best practice Blueprints and Guardrails
- Automate account creation based on AWS best practices
- Monitor compliance status using a single dashboard
